# Add a "Match Ending" checkbox to the Inventory Lookup window

**Will Not Implement**

Currently in the Inventory Lookup window, we have the option to "Match Beginning" when searching, which only returns items beginning with the search criteria. It would be useful to also have a "Match Ending" checkbox, which would essentially allow a user to find an exact match if both boxes were checked. Some of our item numbers are only 3 or 4 characters long and other items exist with the same beginning so we would appreciate the option to find an exact match.
