## Allow scrolling through Item Numbers **Future Consideration**

- JM Jaclynn Moskal
- **Forum name:** #SalesPad Products

In the Item Maintenance window, it would be helpful to be able to scroll through item numbers instead of having to close the window and open a new one to look at the next number. We often have to look up a series of consecutive item numbers and it would be great to be able to click a left/right arrow, previous/next button, etc.
