AR Transaction Entry Emailing Templates and Email Addresses

Future Consideration

- PD Product Development
- **Forum name:** #SalesPad Products

When emailing from the AR Transaction Entry tab on the customer card:

- Customer email addresses are unavailable in the Sent To, CC, BCC fields
- It would be nice to have them available like they are when emailing from the customer, sales docs, etc.

- There is a Templates section, but we don't currently list any templates, and it would be nice to have some available.
- Could add customer templates and/or create a specific customer AR type template
