

Edit Purchase Order User Fields In Historical PO Header Shipped

- CH Curtis Huber
- **Forum name:** #SalesPad Products

When a User Field is added to the Purchase Order Entry header via a custom layout, that user field cannot be edited on historical POs. It can be edited under the User Fields tab, but not on the header. We would appreciate if Purchase Orders were handled the same way as Sales Documents, it is possible to edit user fields on a historical Sales Document header.
