Granular permissions for setting Payment Terms on Sales Documents Will Not Implement

- MT Mathias Tabor

Add a dropdown selection to Security Editor > Sales Document Entry, similar to that for Available Shipping Methods, that would allow changing Payment Terms on a Sales Document. Document Payment Terms should still initially inherit from Customer. If possible, also allow changing terms back to the Terms on the Customer record in addition to the selection(s) in Security settings.

Example: allow Sales to change any document to CREDIT CARD or ADVANCE PAY, as well as changing back to the customer's default terms.
