

Link kit components on a sales line to a purchase order line Future Consideration

- MT Mathias Tabor
- **Forum name:** #SalesPad Products

We have several kit items set up in GP/SalesPad that share components. We do not want to purchase all component in a kit if inventory is short (which is what happens when we try to use the Purchase button in SP). GP allows us to directly link out-of-stock kit component items to a purchase order, but this functionality is missing in SalesPad.
