

# Send Email Report Action - Be able to include a body/message along w/ the report Needs Review

- JS Joe Soriano
- **Forum name:** #Order Intelligence Platform

When the Send Email Report action sends a report, it sends only a small notification and the report. There is no customizable email body/message.

It would be nice to be able to customize a message to include with the report.

Alternatively, could leverage BC's existing customizable messages/templates or have MC send the report via BC's email methods.
