Surface Margin and Related Docs on the BC Item Card Future Consideration

- Colin Orlando

Being able to view Last Sold Price, Margin, and Qty sold, per item, in Business Central, would be a great value add. In BC, this information is difficult to find and adds time to the order entry process. Hoping to solve this problem within the BC UI. Initial thoughts were either a column on the sales line called "last invoiced margin" or "Last Sold Margin" that would show the user what this item was last sold at to this specific customer or digging into the item card in BC to see where we can add value or a section to surface this data.
