User Login/Logout Time Auditing **Needs Review**

- Kevin Albee
- **Forum name:** #SalesPad Products

As of now, there is no way to fully track the login/logout times of users once they are no longer logged into SalesPad Desktop. As a feature idea, it would help to track the login time and logout time of users within SalesPad Desktop to a new database table. That way, it could be referenced in various reports to know when users began working for the day and stopped.
