Blocked Items

Cavallo Support - 2024-11-22 - [System](#)

Overview

Blocked Items functionality allows an authorized user to block the automatic allocation of an item on a sales document. This function is used when there is a limited quantity of an item available and a company wants to prioritize item allocation to specific customers. An item that has been marked as blocked will be backordered when added to a sales line, until an authorized user allocates the item.

Note: Please contact your Account Manager to discuss getting a resource for any custom SQL scripts and/or Quick Reports for Blocked Items.

Note: Blocked items are automatically backordered and rely on the Qty Unblocked. They DO NOT work in conjunction with the setting for Backorder Document Type ID, which will backorder a line item if any values are changed on the line after a save.

Use

If an item is Blocked, the Backordered quantity equals the quantity on the line item minus any available quantity. If an item is not blocked, the total quantity will be allocated. Fulfillment is limited by the available quantity - users cannot fulfill more than the available quantity.

BLOCKING ITEMS

Items can be marked as blocked on the Item Maintenance screen (open Inventory Lookup, search for and select the item, open the Item Properties Tab and click the ellipsis (...) next to Item Number Field):

The screenshot shows the 'Item Maintenance' window with the 'Warehouse & Resource Planning' tab selected. The 'Item Number' field is highlighted with a red box and contains the text 'WIRE-SCD-0001'. Below the 'Item Number' field, the 'Item Blocked' checkbox is checked and also highlighted with a red box. Other fields in the 'Properties' section include 'Item Description' (Single conductor wire), 'Short Description' (Single wire), 'Generic Description' (Wire), 'Replaced By' (empty), 'Copy From Item' (empty), 'Class ID' (ATT CORD), 'Shipping Weight' (150), 'U Of M Schedule' (WIRE), 'Selling UOfM' (FOOT), 'Price Level' (EXTPRCLVL), 'Standard Cost' (0.00), 'Current Cost' (0.16), and 'List Price' (0.35). The 'Item User Fields' section on the right contains 'Product Page Link' (http://www.salespad.net/products/WIRE-SCD-0001) and 'Id_xyz' (empty). The window has 'OK' and 'Cancel' buttons at the bottom right.

UNBLOCKING BLOCKED ITEMS

When a blocked item is added to a sales document, it will be backordered. Then the authorized user can manually determine which customer will receive quantities of the item or items and can unblock quantities as needed.

Users can unblock a blocked item in three ways:

- From the Blocked Items Report module: Select a blocked item or items and click **Unblock Line & Allocate** (Security Editor: Under *Blocked Items Report*, *Can Unblock And Allocate* must be set to True). This will also Allocate other line items on the same document, except for other blocked items. Multiple blocked items from the same document can be selected in the Blocked Items Report.*
- From the "Sales Document Entry" screen - one item at a time: On the line item, change the quantity under the Qty Unblocked column on the line item (Security Editor: Under *Sales Document Line Items*, *Can Change Unblocked Quantity* must be set to True). In addition, you must change the quantity under the Qty Fulfilled column.
- From the "Sales Document Entry" screen - many items at a time: If *Sales Document Entry > Unblock and Allocate* is set to True in the Security Editor, use the **Allocate** button to unblock any blocked items and allocate all lines on a sales document. If *Unblock and Allocate* is set to False, only non-blocked items will be allocated.

*BLOCKED ITEMS REPORT

To open the "Blocked Items" screen, go to Modules > Inventory > Blocked Items Report:

Item Number	Item Description	Warehouse Code	UoM	Qty Blocked	Qty Avail	Qty Backordered	Qty OnHand	Qty Allocated
100XLG	Green Phone	WAREHOUSE	EACH	9	24	9	30	0

Relation Blocked Item Details	Doc. ID	Quantity	Qty Unblocked	Qty Backordered	Qty Fulfilled	Qty Allocated	Customer ID	Customer PO	Doc. Date	Req. Ship Date	Batch	% of Inventory
<input type="checkbox"/> Selected	ORDST2226	1	0	1	1	0	AABOHEFTT0001		4/12/2017	4/12/2017	ORDER54/12	0.00
<input type="checkbox"/>	ORDST2220	5	0	5	5	0	BABESSEH0001		4/12/2017	4/12/2017	EMAIL	0.00
<input type="checkbox"/>	ORDST2213	1	0	1	1	0	AABOHEFTT0001		7/21/2011	7/21/2011	ORDER	0.00
<input type="checkbox"/>	ORDST2215	1	0	1	1	0	AABOHEFTT0001		8/9/2011	8/9/2011	ORDER	0.00
<input type="checkbox"/>	ORDST2238	1	0	1	1	0	AABOHEFTT0001		12/23/2011	12/23/2011	ORDER	0.00
<input type="checkbox"/>	WIRE-MCD-0001					10						0
<input type="checkbox"/>	WIRE-SCD-0001					34						0
<input type="checkbox"/>	WIRE-100					2						0

Organized by warehouse, items with quantity currently blocked on any sales documents will be listed on the grid. Use the Warehouse dropdown to change the warehouse shown:

locked Items

Warehouse: **WAREHOUSE**

Warehouse Code	UoM
----------------	-----

Use the +/- to the left of the item number to expand the displayed details to show (or hide) a list of each document containing the blocked item. The **Expand All** and **Collapse All** buttons can be used to expand or collapse all item details at once:

Allocating Blocked Items

Within an item list, you can change the Qty Unblocked column to indicate how many should be unblocked for each line.

Check the box in the Selected column next to the item or items to be allocated (or click on an Item Number and click the **Check Parent Item** button to select all documents containing the selected blocked item):

☐ 100XLG

Selected	Document
<input type="checkbox"/>	ORDST
<input type="checkbox"/>	ORDST

Qty Blocked

Then click the **Unblock Line & Allocate** button. This will process allocations for the item(s) on the selected

document(s). When allocation is complete, the following message will appear:

Click **OK** and the Blocked Items screen will refresh, removing any allocated documents/items from the display. These items will now be allocated.

Printing

With proper security, the Blocked Items screen can be printed, exported, or sent via email. Click **Print** to access a print preview and click the appropriate icon to print, export, email, etc.

SALES DOCUMENT ENTRY - BLOCKED ITEMS

A blocked item on a sales document is indicated by a red X (or B, depending on how old your version of 4.2 is) on the left side of the line:

The indicator will also appear on the line on the "Sales Line Mass Update" screen.

With proper security, some or all of the line item quantities can be unblocked by changing the number in the Qty Unblocked column.

To add the Qty Unblocked column to the grid, right-click on the column headers and select Column/Band Chooser. Drag and drop the Qty Unblocked column from the "Customization" window onto the column headers:

With proper security, the **Allocate** button can also be used to allocate all blocked items (and all other items on the document).

Expected Behavior for Blocked Items

Start: The pre-save values

Change: The value that is changed

After: The expected values after saving

		Quantity	Qty Back Order	Qty Allocated	Qty Unblocked	Qty Fulfilled
Adding Item	Start	1	0	0	0	0
	Change	10	0	0	0	0
	After	10	10	0	0	0
	Start	10	10	0	0	0

Security

*Blocked Items Report** - enables the Blocked Items Report module, where users can view and manage blocked items and allocations.

Sales Document Line Items > Can Change Unblocked Quantity - enables users to change the unblocked quantity on a sales document line (Qty Unblocked column).

Sales Document Entry > Unblock And Allocate - enables users to unblock blocked items on sales documents and allocate them using the Allocate button. All items on the document will allocate. If False, the allocate button will only allocate non-blocked items.
