Can I add x% upcharge to cover freight in SalesPad Desktop?

Cavallo Support - 2024-11-22 - [FAQ](#)

There is a setting in SalesPad Desktop called "Lower The Payment Amount To Match Total On Capture." When this is set to True, it will allow the user to capture a higher amount than the total on the document. When the preauthorization is captured, the capture amount will be lowered to match the total on the document plus any freight or miscellaneous charges.
