

Checking eConnect Version

Megan De Freitas - 2024-11-22 - Troubleshooting

Your Dynamics GP database stores information about eConnect, including the version number. To retrieve information about eConnect, run the following stored procedure:

```
exec DYNAMICS..taeConnectVersionInfoDYNAMICS
```

It will return the database name, eConnect version, and default company name.

Screen Shot:

The screenshot shows the Microsoft SQL Server Management Studio interface. The Object Explorer on the left displays the 'DYNAMICS' database under 'System Databases'. The central query window shows the execution of the stored procedure `exec DYNAMICS..taeConnectVersionInfoDYNAMICS`. The Results pane at the bottom displays the output of the query.

	DatabaseName	Version	CompanyName
1	TWO	10.0.0.0	Fabrikam, Inc. <TEST>

The status bar at the bottom indicates: Query execut... vmgp10 (8.0 SP3) sa (56) DYNAMICS 00:00:00 1 rows
