

## Checking eConnect Version

Megan De Freitas - 2024-11-22 - Troubleshooting

Your Dynamics GP database stores information about eConnect, including the version number. To retrieve information about eConnect, run the following stored procedure:

```
exec DYNAMICS..taeConnectVersionInfoDYNAMICS
```

It will return the database name, eConnect version, and default company name.

Screen Shot:

The screenshot shows Microsoft SQL Server Management Studio with the following details:

- Object Explorer:** Shows the 'DYNAMICS' database selected under 'System Databases'.
- Query Window:** Contains the SQL command: `exec DYNAMICS..taeConnectVersionInfoDYNAMICS`
- Results Tab:** Displays a table with the following data:

	DatabaseName	Version	CompanyName
1	TWO	10.0.0.0	Fabrikam, Inc. <TEST>
- Messages Tab:** Shows a status message: 'Query execut... vmgp 10 (8.0 SP3) sa (56) DYNAMICS 00:00:00 1 rows'
