Touch Screen™	Allows for saving, editing, and printing signatures on sales documents through a touch screen device.

Hand Held Compatibility DC

Hand Held Models	Please reference the models listed here for compatibility.

EthoTec Commission Plan

EthoTec Commission Plan is an automated commission management system with seamless integration into Dynamics GP. Commission Plan works well with SalesPad with the following caveats:

1. You cannot edit commissions while creating a sales document in SalesPad (this is because SalesPad operates outside of Dynamics GP, so there is no way to access our Commission Plan Entry window). You can edit commissions within Dynamics GP once the sales document is imported to Dynamics GP.
2. When creating inventory items in SalesPad, an item plan will not be assigned unless you've marked the Default checkbox in the Item Commission Plan Setup window for one of the item plans.
3. For sales documents created in SalesPad, the associated commissions will not be created until something affects those sales documents within Dynamics GP – saving the documents, transferring, posting, etc. You can always run Commission Plan utilities with the Create option marked for the sales documents created in SalesPad to create the associated commissions.
