

Configuring Profit Analytics for Finance & Operations

Megan De Freitas - 2024-12-03 - Profit Analytics Documentation

Overview

This document provides a step-by-step guide for provisioning Profit Analytics with Microsoft Finance and Operations. Please note that after completing the steps below, there will be a period of downtime until the newly created Profit Analytics company is fully operational. You will receive an email notification once the company data synchronization is complete.

Step by Step Guide:

Follow the below steps to configure Profit Analytics for Microsoft F&O:

1. Connect F&O to Power Apps

Before configuring table data, Power Apps must first be set up in the F&O environment being onboarded to Profit Analytics. Please refer to the following Microsoft documentation to complete this step, and then return to proceed with step 2.

[Configuring Power Apps](#)

The screenshot shows the Power Platform admin center interface. The left sidebar contains navigation options: Environments, Analytics, Resources, Help + support, Data integration, Data (preview), Policies, and Admin centers. The main content area displays the configuration for an environment named 'msp-sf-jpwest'. The 'Details' section shows the following information:

Details		See all	Edit
Type	Sandbox	Region	Japan
Refresh cadence	Frequent	Purpose	Not specified
Finance and Operations URL	https://msp-sf-jpwest.sandbox.operations.dynamics...		

Below the details section, there is an 'Add database' section with a '+ Add database' button. A note at the bottom states: 'Collect, store, and share your data. Create database for this environment. [Learn more about databases](#)'

2. Connect to Synapse Link

Once Power Apps is successfully integrated, the next step is to connect Azure Synapse Link. To find Synapse Link, navigate to make.powerapps.com and log in. On the left side, locate "more" and then click "discover all". As seen in the below screenshot, Synapse Link can be

custinvoicejour, custinvoicetrans, custgroup, custtable, dirpartylocation, dirpartytable, dirperson, dirpersonname, dlvmode, ecorescategory, ecoresproduct, ecoresproducttranslation, hcmemployment, hcmemploymentdetail, hcmworker, inventdim, inventitemgroupitem, inventlocation, inventtable, inventtrans, inventtransorigin, inventtablemodule, logisticsaddresscountryregion, logisticsaddresscountryregiontranslation, logisticselectronicaddress, logisticslocation, logisticspostaladdress, paymterm, pricediscgroup, smmbusrelsalesdistrictgroup, taxgroupheading

After the tables are added, they will be visible within Azure Synapse Link. Please note that there are 2 statuses that can appear in the Synapse Link "Status" column. This column will always show "error" at first, but as tables are added this will change to "active". This process can take upto several hours.

Table ID	Name	Sync status	Last synchronized on	Count	Partitions	Entity source	Fabric status
Address	logisticpostaladdress	Active	5/25/2024, 4:07:06 PM	1827	Year	FabricTables	Not created
Advances invoice	custadvancesinvoice	Active	5/11/2024, 2:13:11 PM	9	Year	FabricTables	Not created
Archived inventory transactions	inventtransarchive	Active	5/14/2024, 10:04:04 PM	9	Year	FabricTables	Not created
Backorder invoice lines	custbackorderinvoicelines	Active	5/11/2024, 2:13:09 PM	37	Year	FabricTables	Not created
Billing code	custbillcode	Active	5/11/2024, 2:13:06 PM	9	Year	FabricTables	Not created
Call center sales line	invoiceline	Active	5/21/2024, 10:25:49 PM	88	Year	FabricTables	Not created
Call center sales orders shipping	invoicelineordershipping	Active	5/21/2024, 10:27:05 PM	25	Year	FabricTables	Not created
Category	ecorescategory	Active	5/21/2024, 10:27:05 PM	745	Year	FabricTables	Not created
Commission table rep.	commissionsalerep	Active	5/13/2024, 4:11:51 PM	28	Year	FabricTables	Not created
Communication details	logisticselectronicaddress	Active	5/21/2024, 10:26:29 PM	1946	Year	FabricTables	Not created
Confirmation lines	custconfirmations	Active	5/16/2024, 6:06:17 PM	762	Year	FabricTables	Not created
Country/region	logisticaddresscountryregion	Active	5/21/2024, 10:25:49 PM	293	Year	FabricTables	Not created
Country/region translations	logisticaddresscountryregiontranslation	Active	5/21/2024, 10:26:17 PM	18764	Year	FabricTables	Not created
Customer - payment schedules	custpaymentsched	Active	5/11/2024, 2:13:11 PM	14	Year	FabricTables	Not created
Customer default locations	custdefaultlocation	Active	5/25/2024, 4:06:55 PM	388	Year	FabricTables	Not created
Customer free text invoice	custinvoicetable	Active	10/9/2024, 2:07:51 PM	53	Year	FabricTables	Not created
Customer free text invoice	-	-	-	-	-	-	-

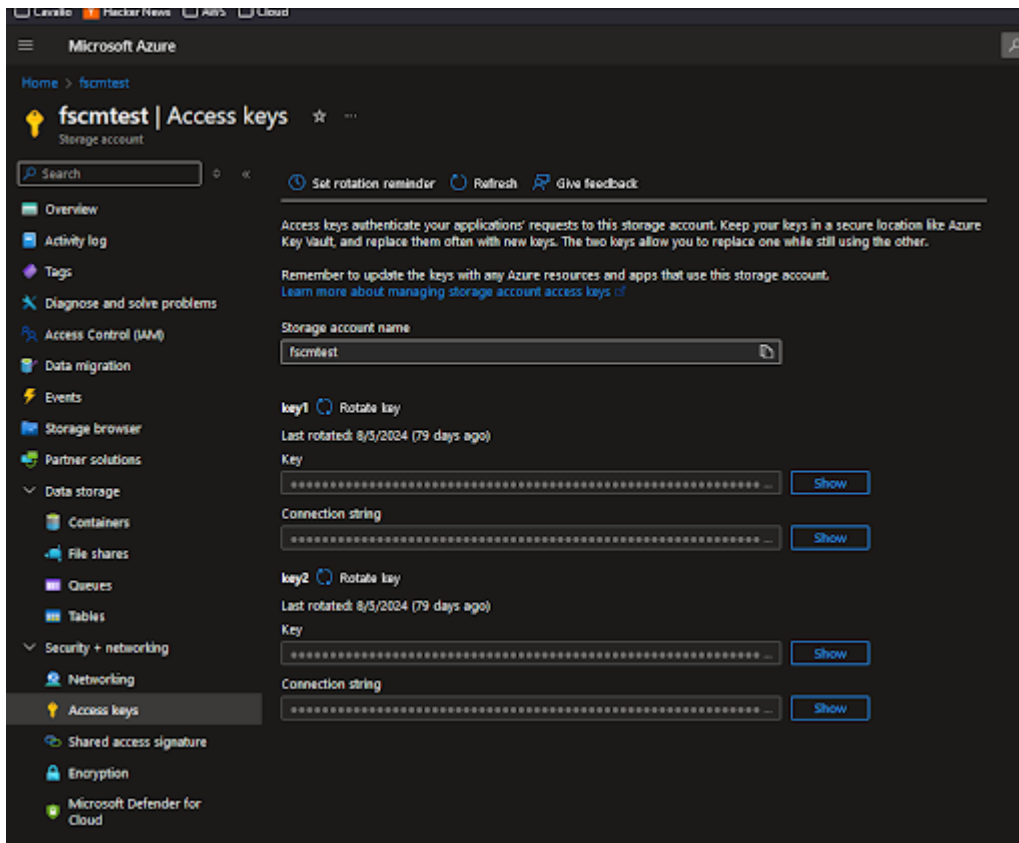

For more information on Synapse Link please visit their [documentation here!](#)

3. Configure Azure Portal

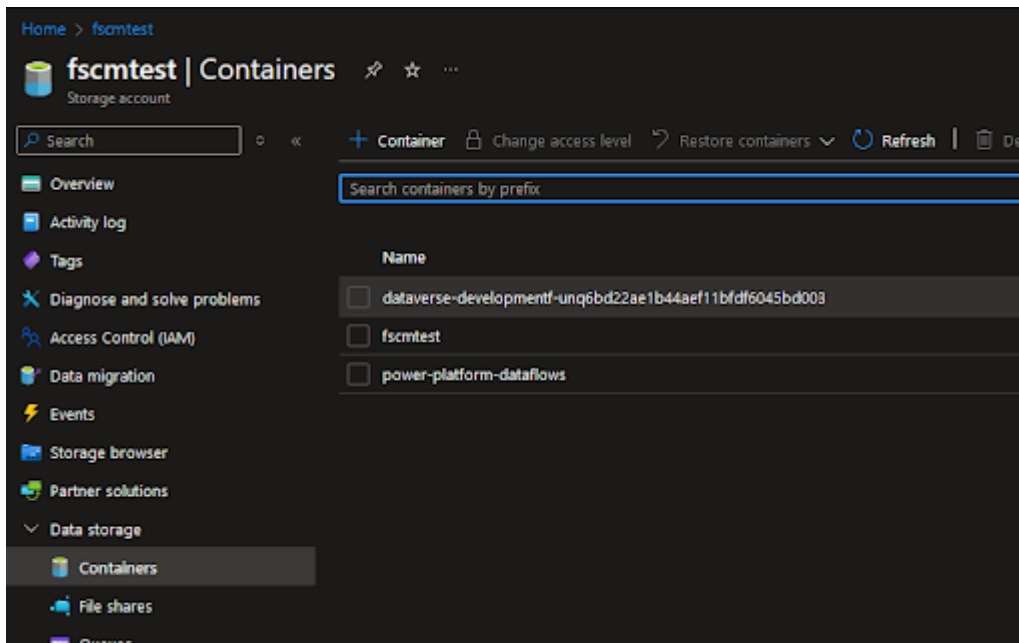

After Azure Synapse Link setup is completed, a workspace storage account and spark pool will be available within the Azure Portal. Navigate to "Storage" and double check that with the Data Lake Storage a folder was created within Azure.

The last portion of setup is to retrieve the access key, storage name and container name. Below are images to show where these can be located within Azure

Storage Name and Access Key:

Container:

4. Cavallo Onboarding Flow

Starting from Welcome Email

For net new users of Profit Analytics for F&O, the initial "Owner" role will receive an email from Cavallo to let them know their product is ready for onboarding.

Welcome To Cavallo

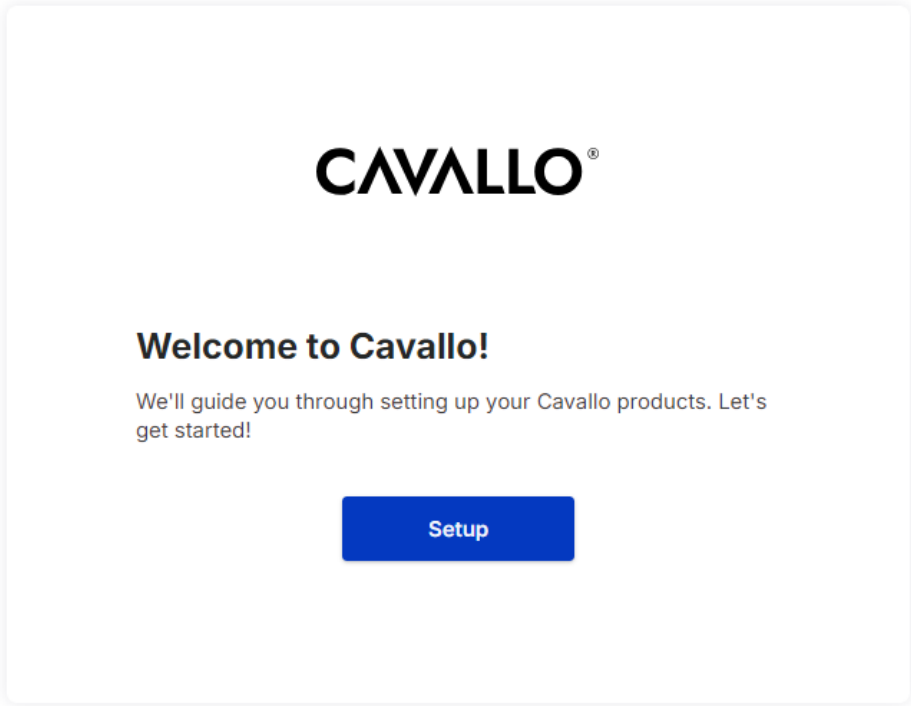

You have been invited to join an organization using Cavallo!

[Accept Invite](#)

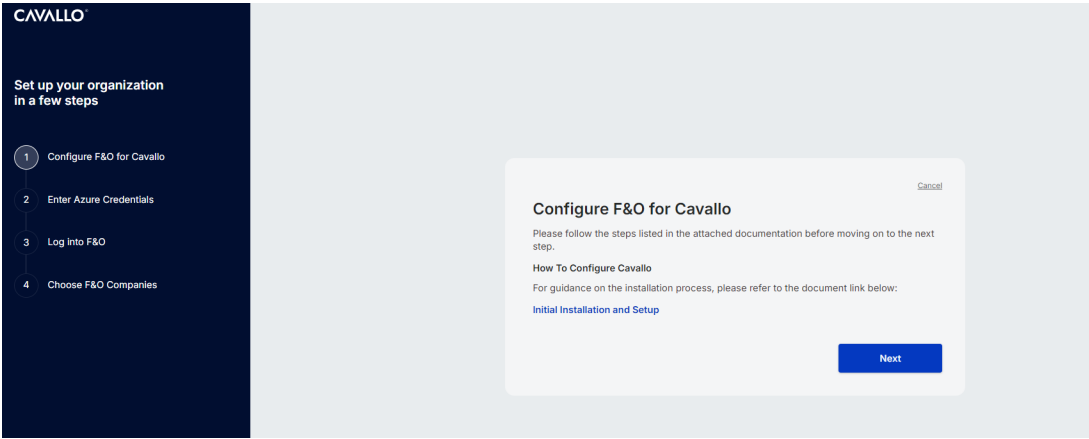

Follow the link to create your Cavallo login.

Clicking on the button in the email will bring the user into the Cavallo onboarding flow.

In the initial step of the onboarding flow, users are provided with information on how to complete the process, along with a link to this document. Please note that the three sections outlined above are prerequisites for successfully completing the Cavallo onboarding process.

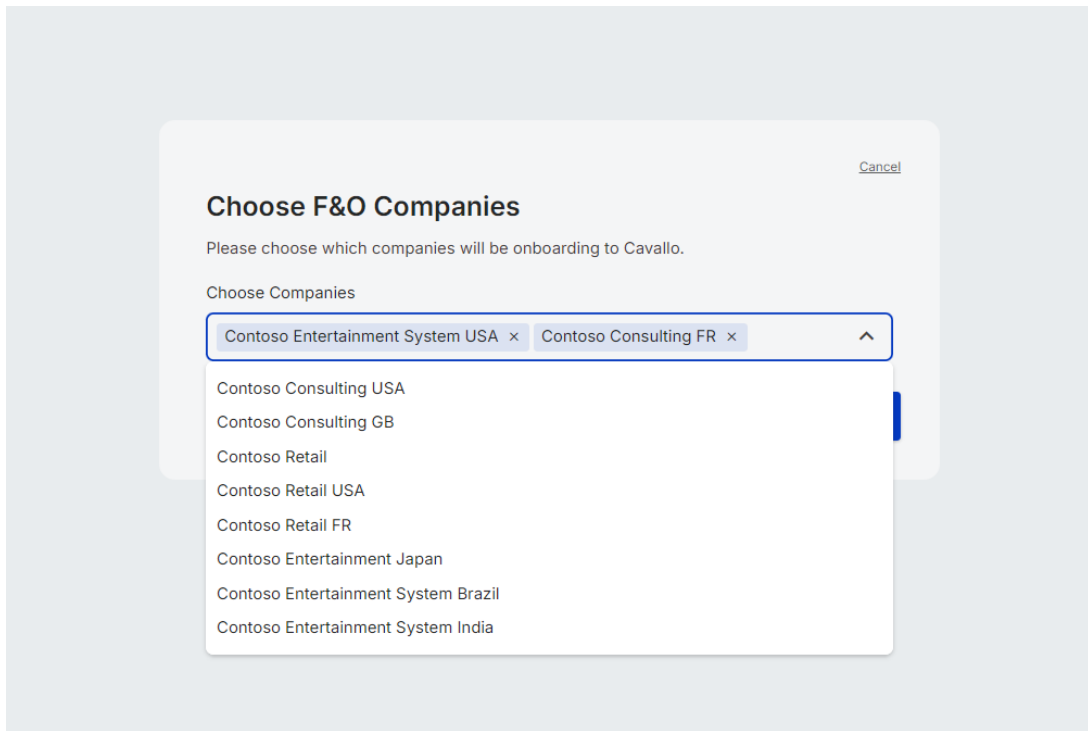

Step two of the onboarding process requires users to enter their pre-configured Azure credentials. All three fields must be filled out to proceed. Please note that Cavallo will validate the credentials upon clicking the "Next" button to ensure they are correct.

The screenshot shows a form titled "Enter Azure Credentials" with a "Cancel" link in the top right corner. Below the title is the instruction: "Fill out your Azure details below so we can get your account connected." The form contains three input fields: "Name of Storage", "Client Access Key", and "Container Name", each with a "Value" placeholder. At the bottom, there are two buttons: "Back" (active) and "Next" (disabled).

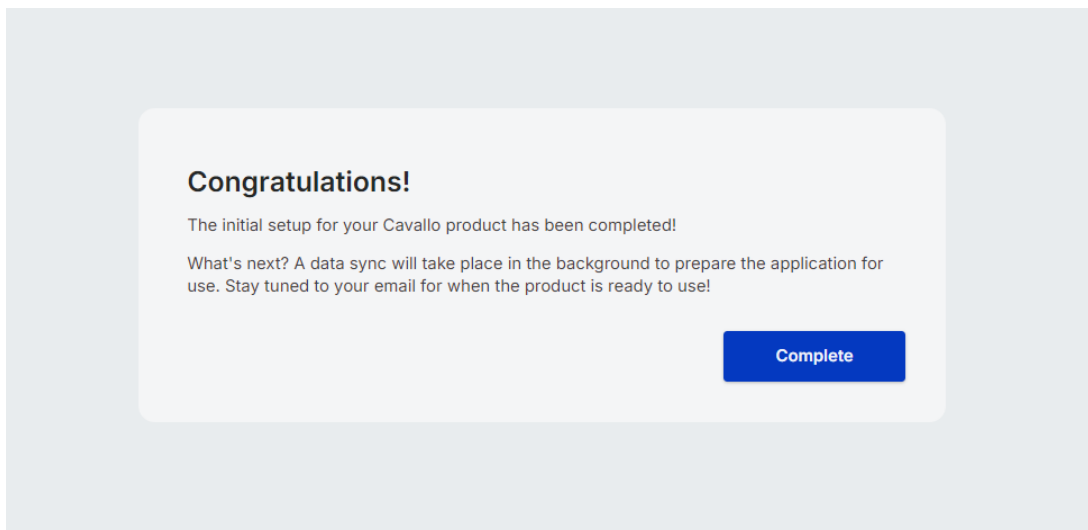

If the credentials provided are correct, users will proceed to step 3. In this step, they are required to copy and paste the F&O ERP URL they use daily to access the product. This allows Cavallo to redirect the user to Microsoft for login and retrieve all available companies for onboarding to Profit Analytics.

The screenshot shows a form titled "Log into F&O to continue" with a "Cancel" link in the top right corner. Below the title is the instruction: "Log into F&O by clicking the button below. This step is required in order to connect F&O companies to Profit Analytics." The form contains a "Uri" label and a text input field with the value "https://developmentfscm.operations.dynamics.com/". At the bottom, there are two buttons: "Back" and "Log in" (active).

Once successfully logged into F&O, the next step will require users to select the companies they wish to onboard. This step is a multi-select and for each F&O company selected, a unique Profit Analytics company will be created.

The onboarding flow concludes by informing users that a data sync will occur before they can begin using the product. This ensures all widgets are populated with data from the newly selected company. An email will be sent to the user who completed the onboarding to notify them when the product is ready for use. Please note that this process may take anywhere from a few hours to a few days, depending on the size of the data set. For any questions or concerns regarding this process, please contact support at support@cavallo.com.

FAQs

Q: What happens in the event my Azure Access Key changes?

A: In the event the key is cycled, please reach out to Support@Cavallo.com. We can assist

with changing this in all related F&O organizations.
