Create a Dev Shopify Store (Legacy)

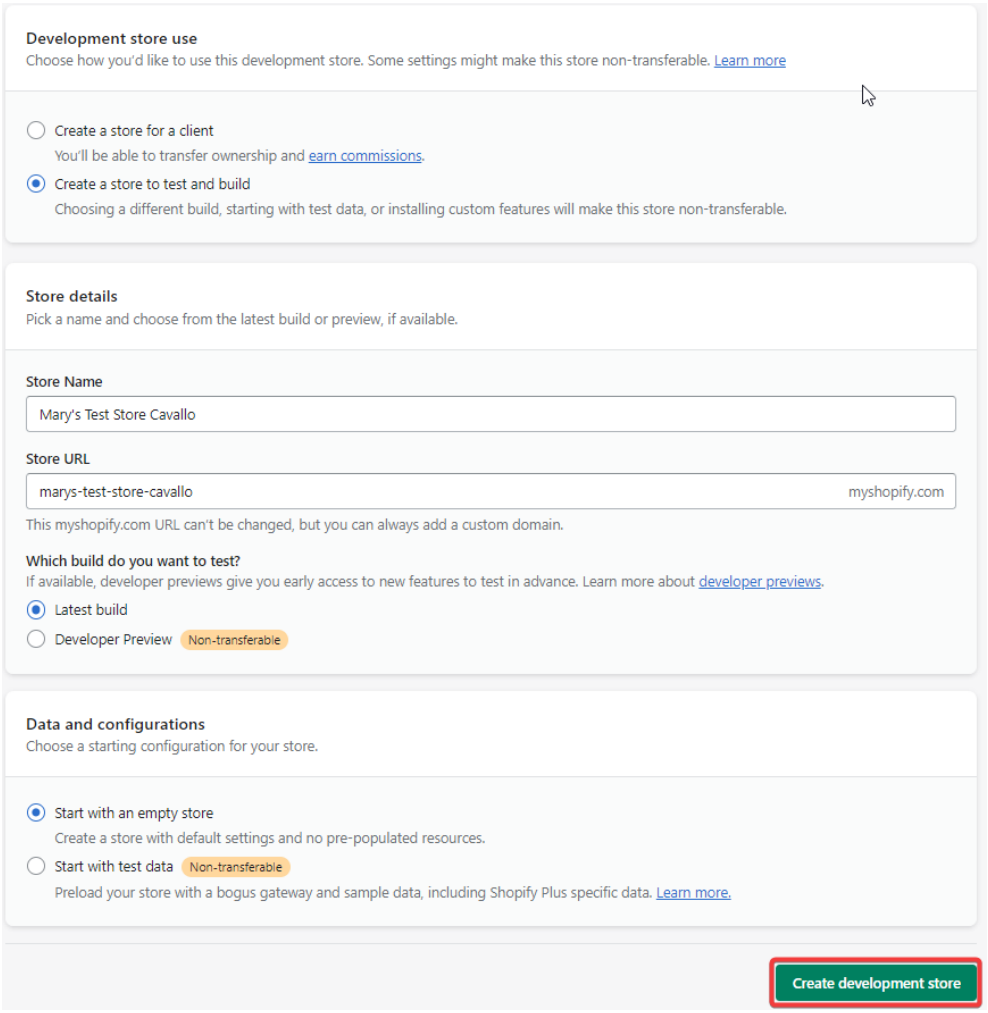

Cavallo Support - 2026-04-02 - Setup

Note: The method of creating a custom app and API connection for Shopify demonstrated here is currently unsupported by Shopify. For the currently supported method via the Dev Dashboard, please see Creating a Shopify App For SalesPad Desktop.

1. **Navigate to https://shopify.dev/ & create an account**
2. **Create a development store**
    1. **Select 'Stores' → Create a development store**

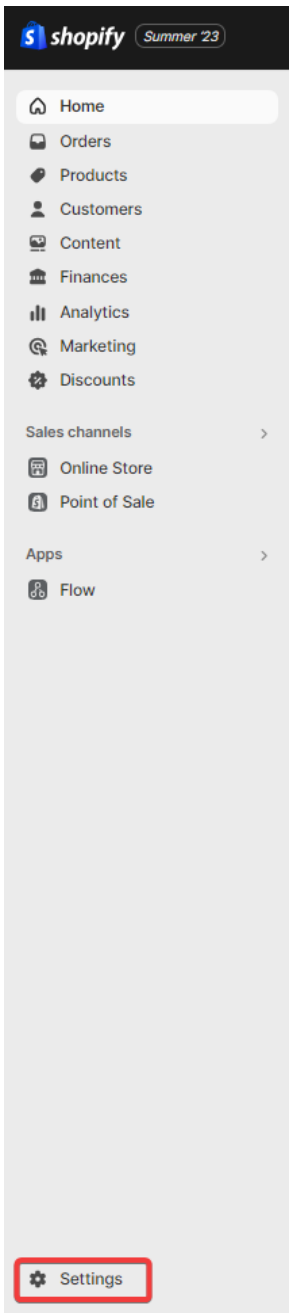

1. **Fill out the developer store information and select create development store**

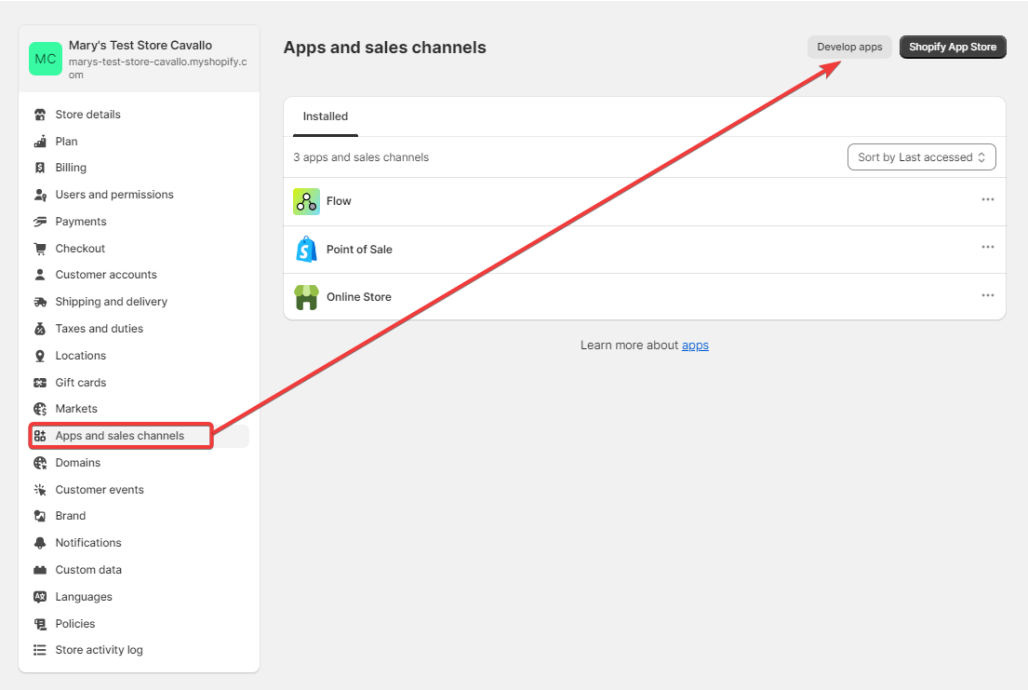

Create an App & Provide the Shop URL and Admin Access Token

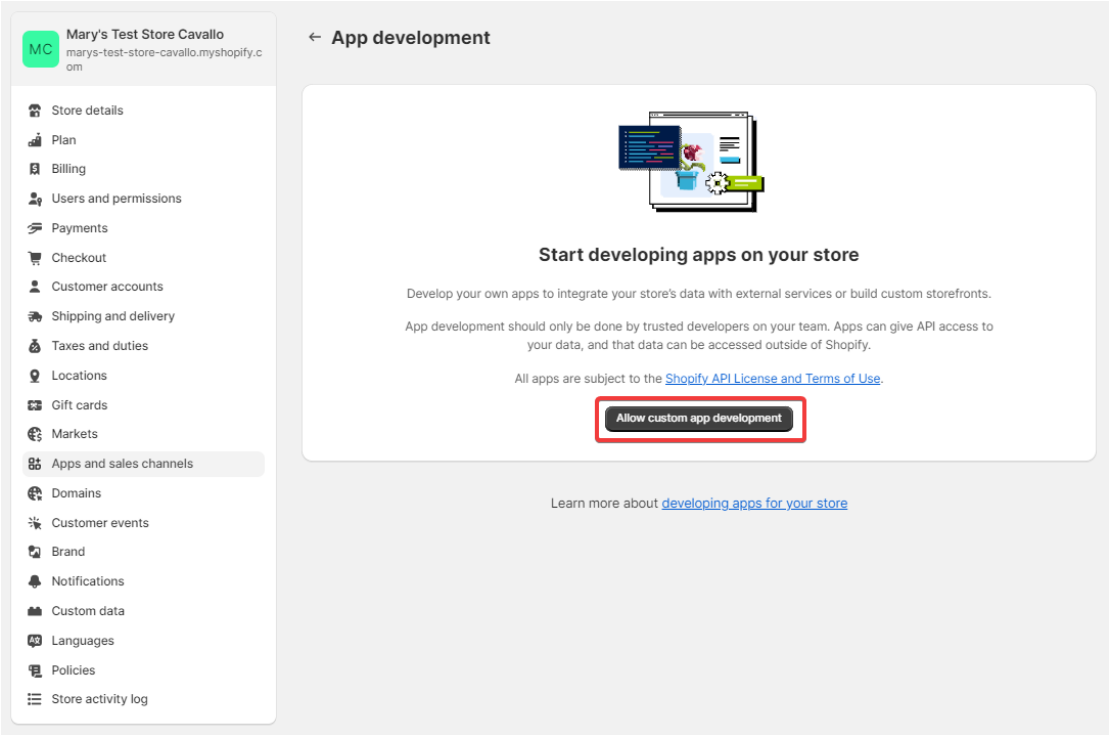

1. **Navigate to your settings**

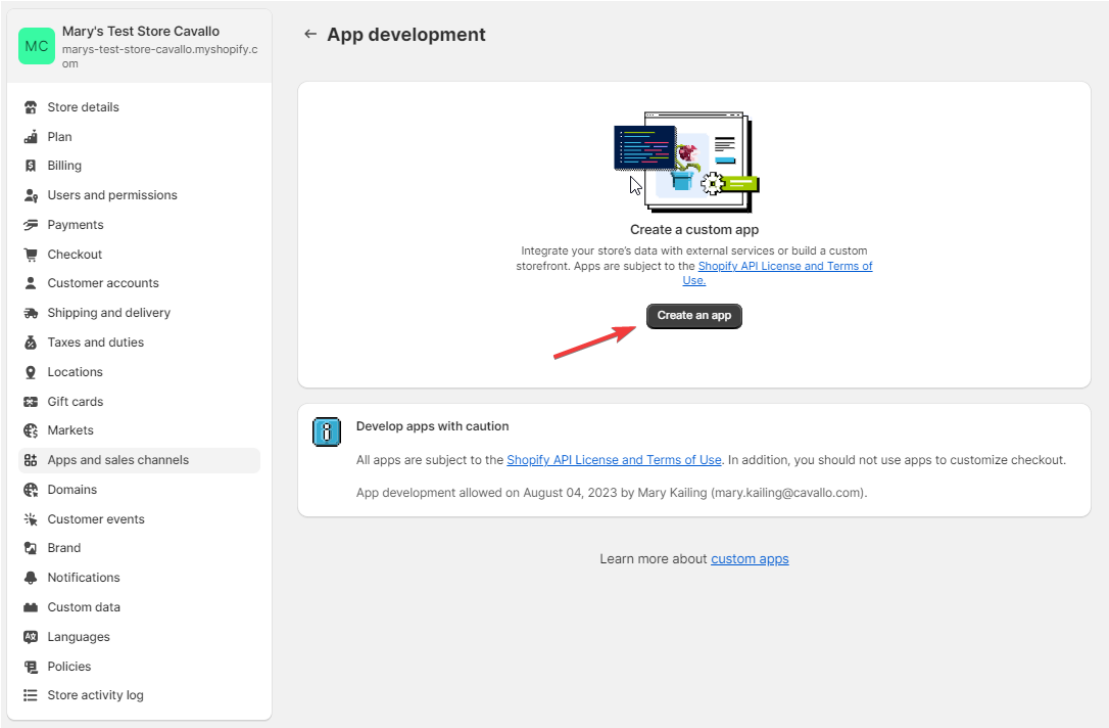

1. **Click on App and Sales Channels → Develop Apps**

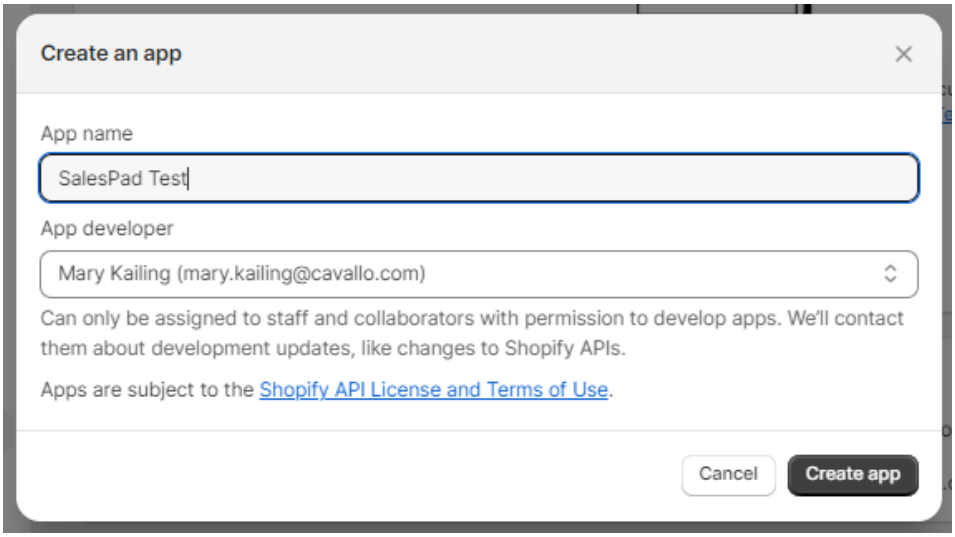

1. **Click Allow custom app development**

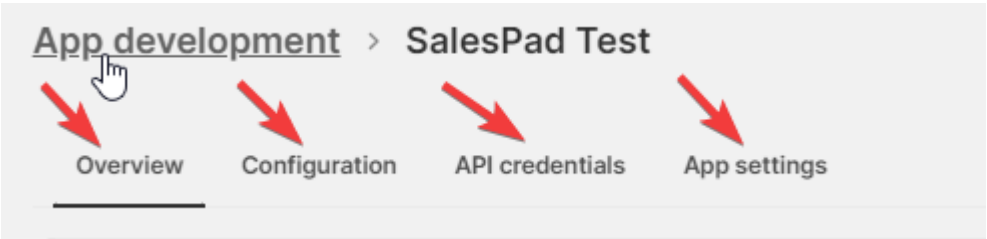

1. **Create an app**

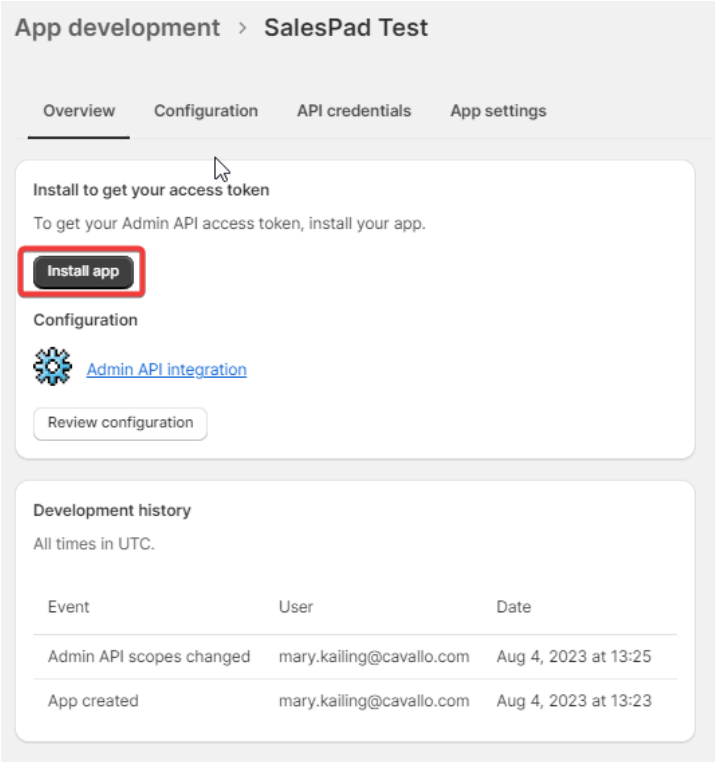

1. **Configure your app (mimic your current Shopify store settings here)**

1. **Install App**

1. **Reveal/copy your Admin API Access Token**
