

## Create a Dev Shopify Store

Megan De Freitas - 2024-11-22 - Setup

1. Navigate to <https://shopify.dev/> & create an account
2. Create a development store
  1. Select 'Stores' → Create a development store

1. Fill out the developer store information and select create development store

**Development store use**

Choose how you'd like to use this development store. Some settings might make this store non-transferable. [Learn more](#)

☐ Create a store for a client

You'll be able to transfer ownership and [earn commissions](#).

☒ Create a store to test and build

Choosing a different build, starting with test data, or installing custom features will make this store non-transferable.

**Store details**

Pick a name and choose from the latest build or preview, if available.

**Store Name**

Mary's Test Store Cavallo

**Store URL**

marys-test-store-cavallo

myshopify.com

This myshopify.com URL can't be changed, but you can always add a custom domain.

**Which build do you want to test?**

If available, developer previews give you early access to new features to test in advance. Learn more about [developer previews](#).

☒ Latest build

☐ Developer Preview Non-transferable

**Data and configurations**

Choose a starting configuration for your store.

☒ Start with an empty store

Create a store with default settings and no pre-populated resources.

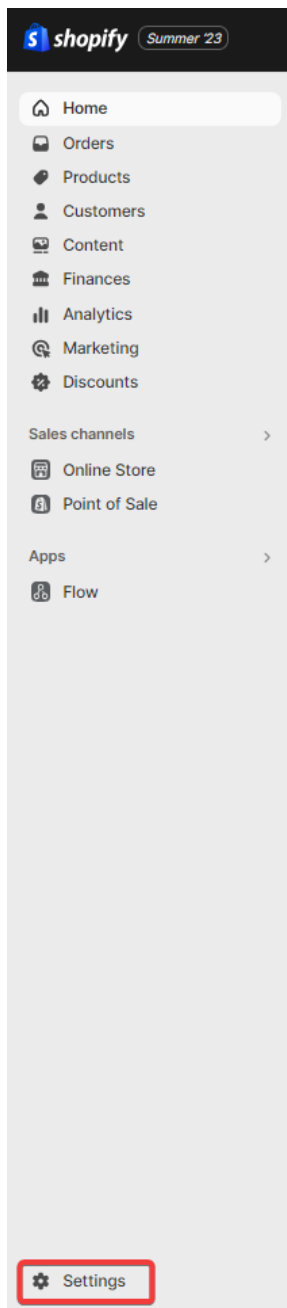

☐ Start with test data Non-transferable

Preload your store with a bogus gateway and sample data, including Shopify Plus specific data. [Learn more](#).

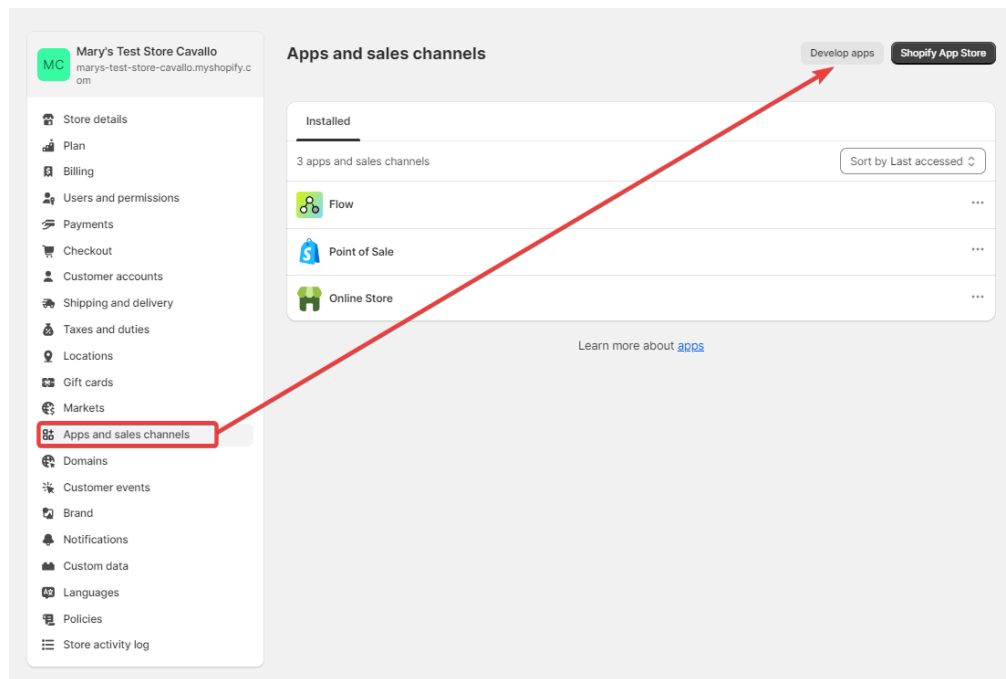

Create development store

## Create an App & Provide the Shop URL and Admin Access Token

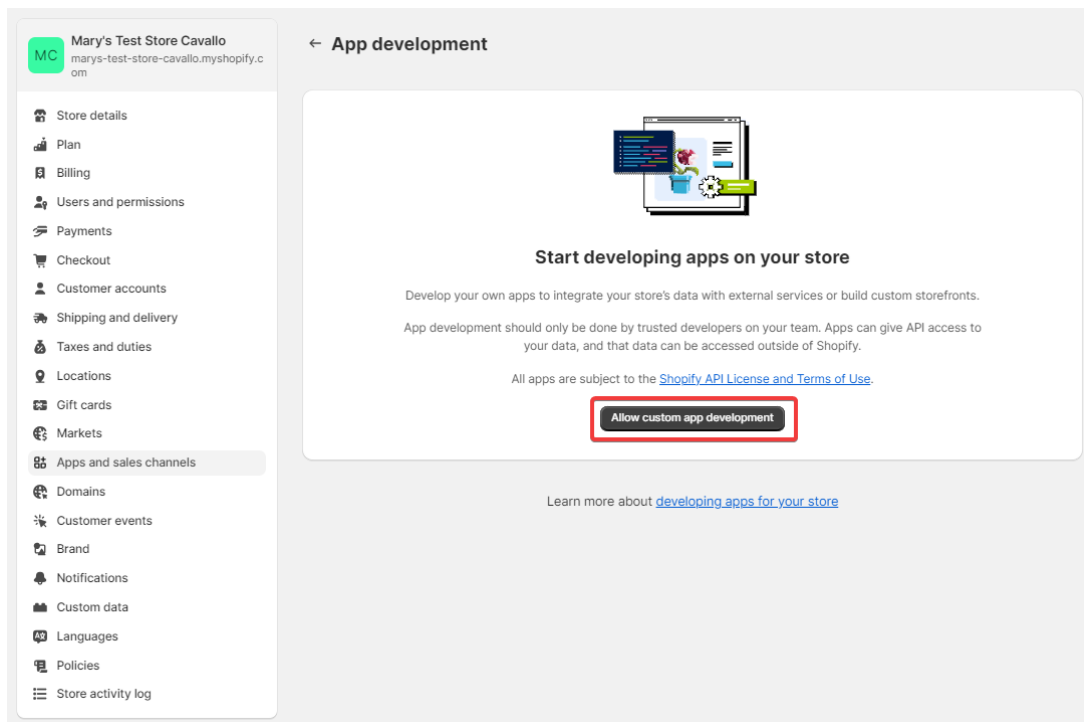

### 1. Navigate to your settings

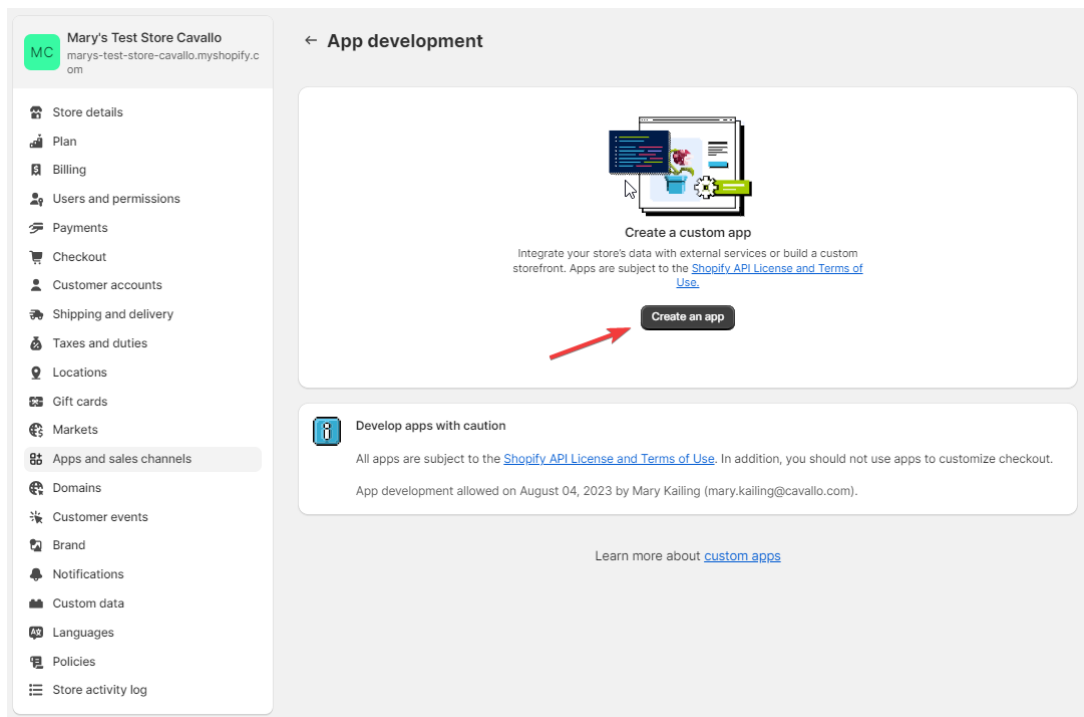

1. Click on App and Sales Channels → Develop Apps

## 1. Click Allow custom app development

## 1. Create an app

Create an app

App name  
SalesPad Test

App developer  
Mary Kailing (mary.kailing@cavallo.com)

Can only be assigned to staff and collaborators with permission to develop apps. We'll contact them about development updates, like changes to Shopify APIs.

Apps are subject to the [Shopify API License and Terms of Use](#).

Cancel Create app

### 1. Configure your app (mimic your current Shopify store settings here)

### 1. Install App

App development > SalesPad Test

Overview Configuration API credentials App settings

Install to get your access token

To get your Admin API access token, install your app.

**Install app**

Configuration

 [Admin API integration](#)

[Review configuration](#)

Development history

All times in UTC.

Event	User	Date
Admin API scopes changed	mary.kailing@cavallo.com	Aug 4, 2023 at 13:25
App created	mary.kailing@cavallo.com	Aug 4, 2023 at 13:23

### 1. Reveal/copy your Admin API Access Token

App development > SalesPad Test **Installed**

Overview Configuration **API credentials** App settings

API credentials

**Admin API access token**

Use your access token to request data from the [Admin API](#).

 To protect your data, you'll only be able to reveal your Admin API token once.  
Copy and save your Admin API access token in a secure place.

..... **Reveal token once**
