Create a Dev Shopify Store (Legacy)

Cavallo Support - 2026-04-02 - [Setup](#)

Note: The method of creating a custom app and API connection for Shopify demonstrated here is currently unsupported by Shopify. For the currently supported method via the Dev Dashboard, please see [Creating a Shopify App For SalesPad Desktop](#).

1. Navigate to <https://shopify.dev/> & create an account
2. Create a development store
 1. Select 'Stores' → Create a development store

1. Fill out the developer store information and select create development store

Development store use
Choose how you'd like to use this development store. Some settings might make this store non-transferable. [Learn more](#)

Create a store for a client
You'll be able to transfer ownership and [earn commissions](#).

Create a store to test and build
Choosing a different build, starting with test data, or installing custom features will make this store non-transferable.

Store details
Pick a name and choose from the latest build or preview, if available.

Store Name

Store URL

This myshopify.com URL can't be changed, but you can always add a custom domain.

Which build do you want to test?
If available, developer previews give you early access to new features to test in advance. Learn more about [developer previews](#).

Latest build

Developer Preview Non-transferable

Data and configurations
Choose a starting configuration for your store.

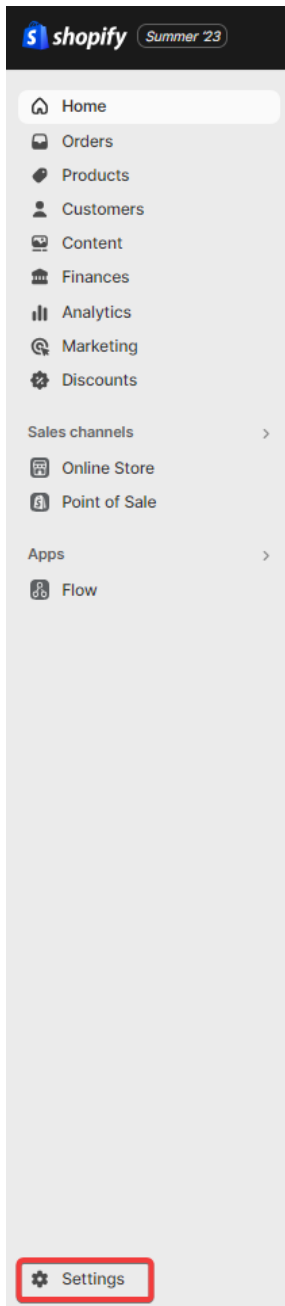

Start with an empty store
Create a store with default settings and no pre-populated resources.

Start with test data Non-transferable
Preload your store with a bogus gateway and sample data, including Shopify Plus specific data. [Learn more](#).

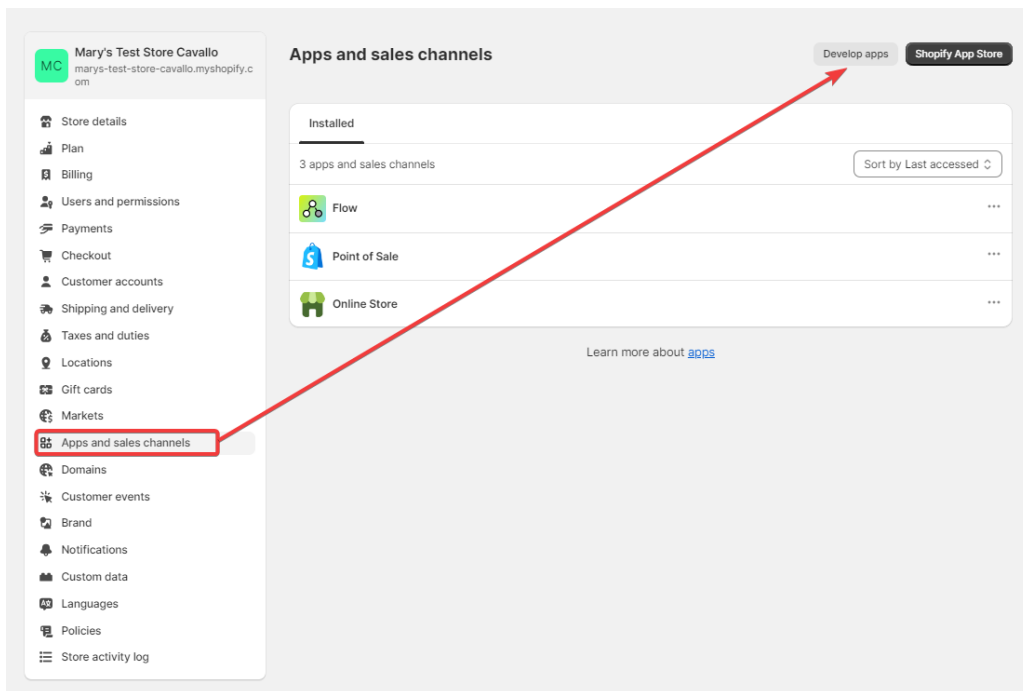

[Create development store](#)

Create an App & Provide the Shop URL and Admin Access Token

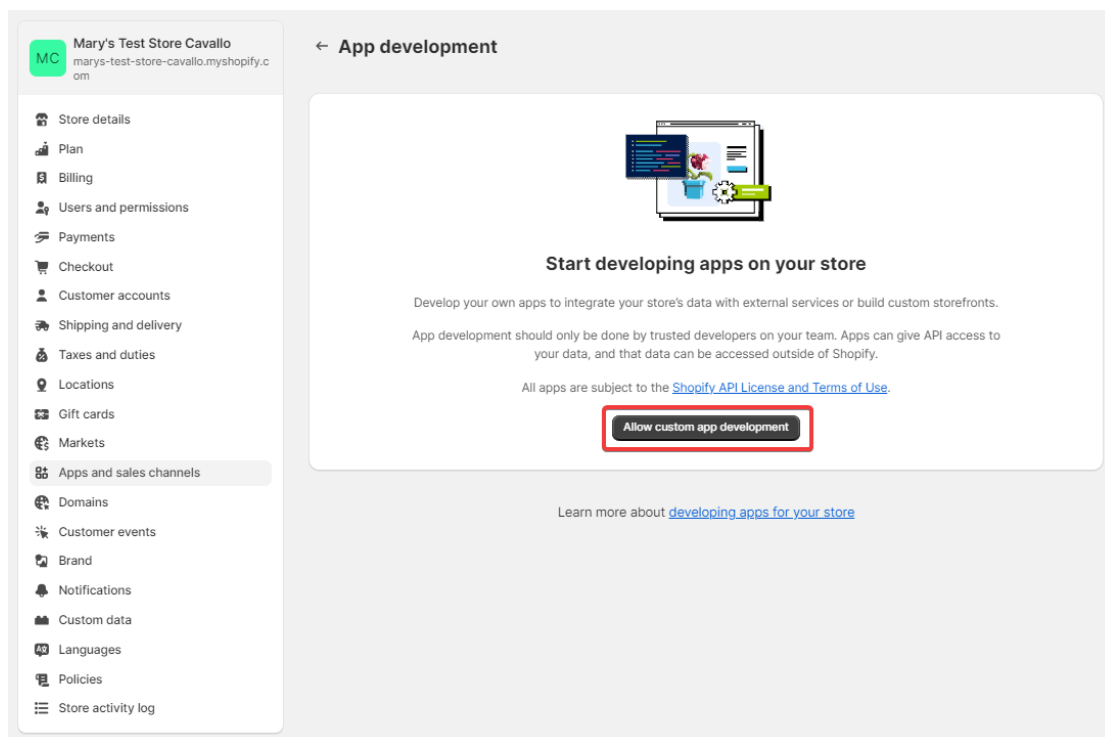

1. Navigate to your settings

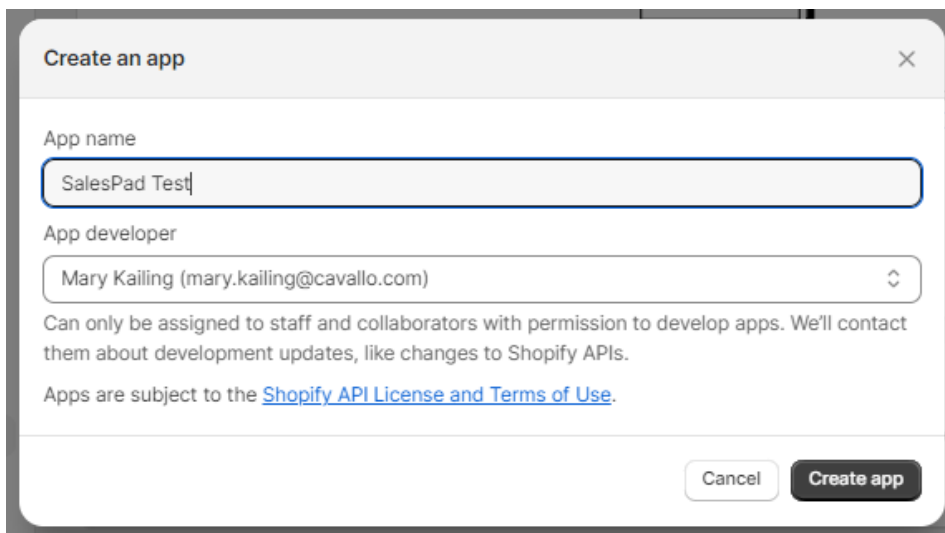

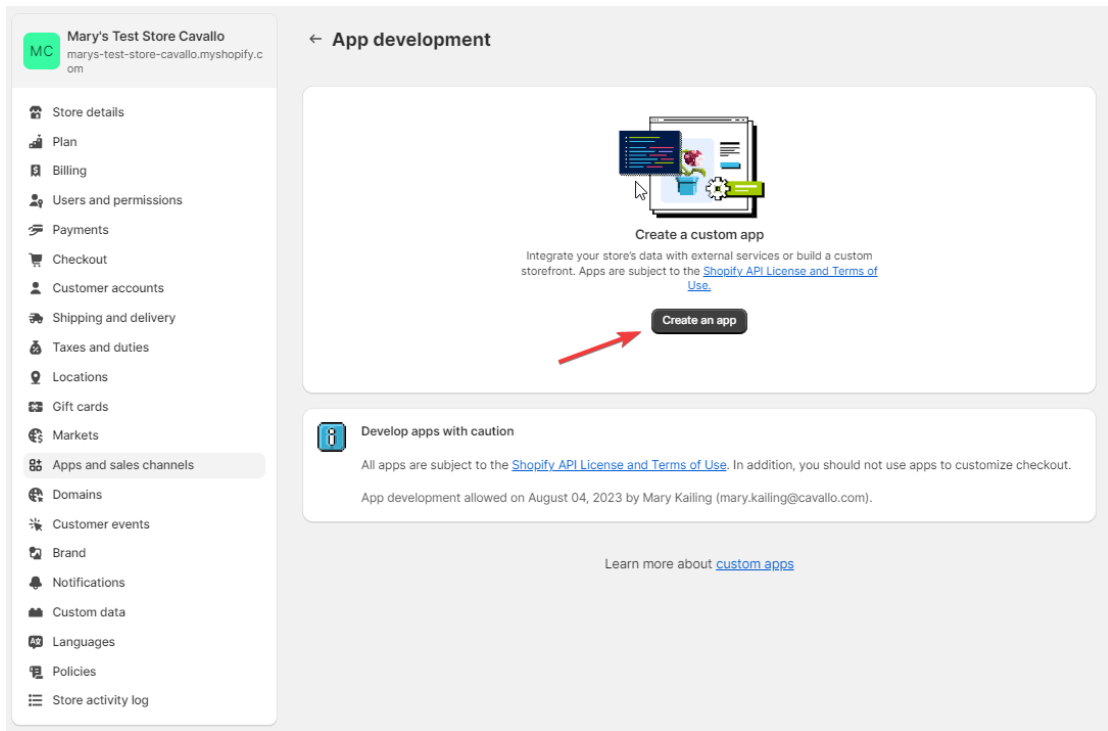

1. Click on App and Sales Channels → Develop Apps

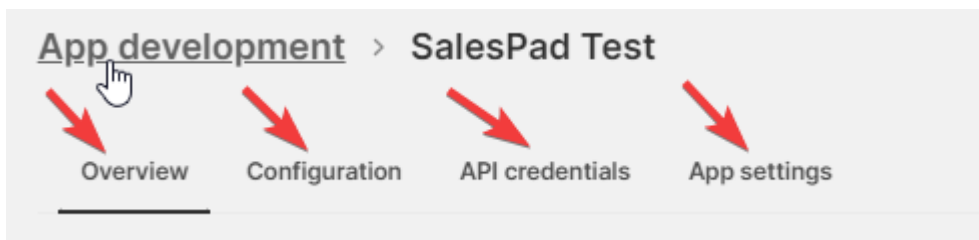

1. Click Allow custom app development

1. Create an app

1. **Configure your app (mimic your current Shopify store settings here)**

1. **Install App**

App development > SalesPad Test

Overview Configuration API credentials App settings

Install to get your access token

To get your Admin API access token, install your app.

Install app

Configuration

 [Admin API integration](#)

Review configuration

Development history

All times in UTC.

Event	User	Date
Admin API scopes changed	mary.kailing@cavallo.com	Aug 4, 2023 at 13:25
App created	mary.kailing@cavallo.com	Aug 4, 2023 at 13:23

1. Reveal/copy your Admin API Access Token

App development > SalesPad Test Installed

Overview Configuration API credentials App settings

API credentials

Admin API access token

Use your access token to request data from the [Admin API](#).

 To protect your data, you'll only be able to reveal your Admin API token once. Copy and save your Admin API access token in a secure place.

.....

Reveal token once
