Developer Resources

Megan De Freitas - 2025-06-11 - [Troubleshooting](#)

SalesPad software is customizable for developers in the following ways:

PreSave, PreLoad Scripts

- [PreSave Examples and Field Reference](#)
- [Customer Address Card PreSave Script](#)
- [New Customer PreSave Script](#)

Quick Reports

- [Quick Reports](#)
- [Quick Reports Reference Guide](#)
- [Finding and Editing Quick Report Source Files](#)
- [Quick Report Sales Line Detail by Workflow Queue](#)

Custom Stored Procedure

- [Report Designer Stored Procedure spcpSalesDocumentReport](#)
- [Stored Procedure User Fields Mapped to the GP User Fields](#)

Filter Scripts

- [Profile Selector and Script Manager](#)
- [Filter Scripts | SalesPad Desktop](#)

SalesPad Web API

- The API Help Page is accessed when clicking Browse in IIS for your SalesPad API site and then clicking API Help.

Configurability: Modules that are heavily configured:

- [Desktop: Workflow](#)
- [User Defined Fields](#)
- [Settings | SalesPad Desktop](#)
- [Customizing Layouts](#)
- [Business Rules](#)

Please note that the Billing and Shipping Notification Email are stored in the PropertyValue column of SY90000.
