## Does SalesPad Cloud have a CRM component?

Megan De Freitas - 2024-11-25 - FAQ

SalesPad Cloud handles CRM functions in the [Customers](#) module. Here you can see your integrated data, add/edit customers, record interactions, and create new transactions right from the customer card. Open the Audit tab on a customer card to view the audit trail.

The screenshot shows a navigation bar with several tabs: Sales Documents, Contacts, Item Sales, A/R, Interactions, Audits, and Notes. The 'Audits' tab is highlighted with a red border. Below the navigation bar is a blue header for a 'Message' section, which contains the text: 'Charleston Civic Center has been created.'
