EDI 855 - Set Possible Status Codes For Each Trading Partner

Megan De Freitas - 2024-12-03 - [EDI](#)

Overview

Functionality has been added to allow users to specify which status codes can be automatically sent on EDI 855s.

Testing Setup

A new column, **855 Status Codes**, has been added to the EDI Data Cross Reference Partners grid.

855 Status Codes

IA (Accept), ID (Item Deleted) ▼

☒ (Select All)

☐ BP (Item Accepted - Partial Shipment, Balance Backor)

☒ IA (Accept)

☐ IB (Backordered)

☒ ID (Item Deleted)

☐ IP (Accept - Price Changed)

☐ IQ (Accept - Quantity Changed)

OK Cancel

This is a multi-select dropdown to set which status codes can be automatically sent on the EDI 855. Leaving this column blank will allow all status codes to be sent.

Testing Scenarios

In the EDI 855 plugin on the sales document, you can see that the status codes that were not selected in the cross reference were also not set as the default status code, even if the criteria to send the code would be met. Note, codes that were not set in the cross reference can still be sent using the Override Status Code column.

Order Acknowledgement

Cells in yellow are different from the original PO.

Properties:

Sales Doc Num:

ORDST0020201

Customer PO Num:

PO000171

Shipping Method:

COURIER

Delivery Date:

12/1/2021

Ship To Address Code:

WAREHOUSE

Bill To Address Code:

PRIMARY

Accept or reject this order?

Accept ☒ Reject ☐

Would you like to send PO Details?

Yes ☒ No ☐
