EDI Service Setup

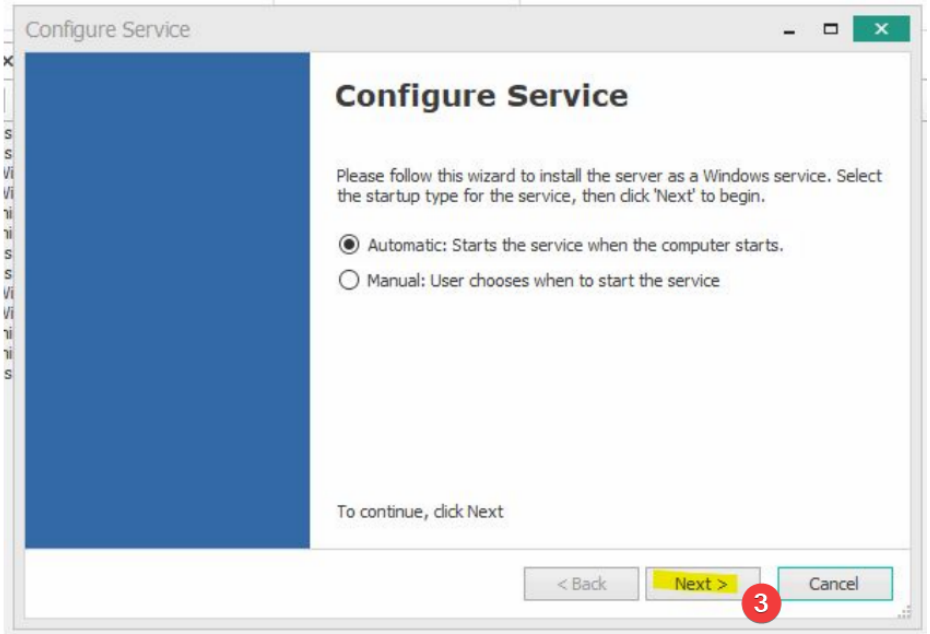

Cavallo Support - 2024-12-03 - EDI

To set up EDI as a service, please follow these steps:

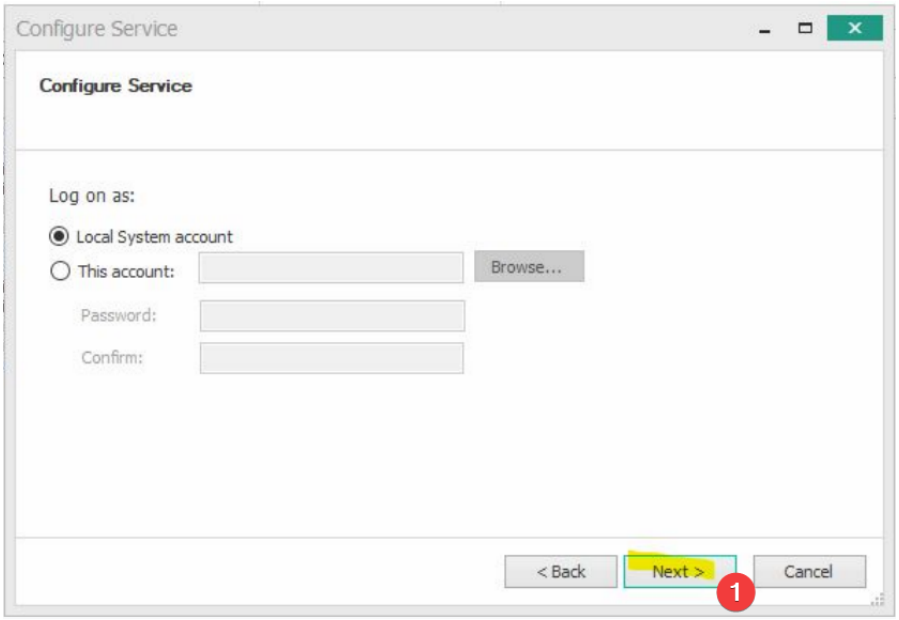

- Click the EDI Service button located at the top of the screen
- Click Install As Service
- Once the Configure Service window appears, click Next

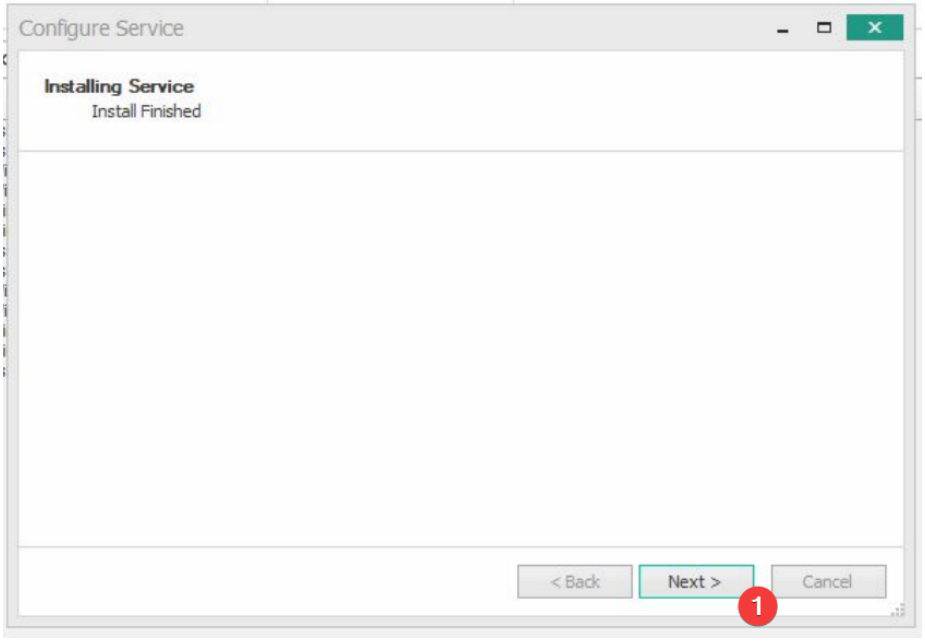

click next

- On the next screen, leave the Log On as "Local System Account", then click Next

- Once the service has been set up you will see the text "Install Finished", click Next and the setup will be complete

NOTE: The EDI Service **does not** work with EDI connections that use Mapped Drives.
