

EDI Service Setup

Megan De Freitas - 2024-11-22 - EDI

To set up EDI as a service, please follow these steps:

- Click the [EDI Service](#) button located at the top of the screen
- Click [Install As Service](#)
- Once the Configure Service window appears, click [Next](#)

- On the next screen, leave the Log On as "Local System Account", then click [Next](#)

- Once the service has been set up you will see the text "Install Finished", click [Next](#) and the setup will be complete

NOTE: The EDI Service **does not** work with EDI connections that use Mapped Drives.
