## **EDI Service Setup**

Megan De Freitas - 2024-12-03 - EDI

To set up EDI as a service, please follow these steps:

- Click the EDI Service button located at the top of the screen
- Click Install As Service
- Once the Configure Service window appears, click <u>Next</u>

## click next

Configure Service	×
	Configure Service
	Please follow this wizard to install the server as a Windows service. Select the startup type for the service, then dick 'Next' to begin.
	Automatic: Starts the service when the computer starts.
	O Manual: User chooses when to start the service
	To continue, click Next
	< Back Next > Cancel
	< Back Next > Cancel

• On the next screen, leave the Log On as "Local System Account", then click Next

onfigure Service			-		x
Configure Service					
Log on as:					
O This account:	Browse				
Password:					
Confirm:					
	< B	Back Next >	(	Cance	el

• Once the service has been set up you will see the text "Install Finished", click <u>Next</u> and the setup will be complete

Configure Service			-		x
Installing Service Install Finished					
	< Back	Next >		Cancel	

NOTE: The EDI Service **does not** work with EDI connections that use Mapped Drives.
