Font Size in SalesPad

Robert Vander Ploeg - 2026-02-09 - Setup

Font Size in SalesPad Desktop

SalesPad does not have a setting or security to scale text size due to limitations with views. It is recommended to use 100% Scale for your display to ensure all views load properly and are visible.

While not officially supported, some users have found success changing their display scaling up to 150% in Windows. Please note that going above 150% scale can cause failure for views to load properly.

Changing Display Scale in Windows

To change the scale setting in Windows, right-click on the desktop and select **Display Settings > Scale.**
