Group Pricing Maintenance

Megan De Freitas - 2024-11-22 - Sales

Overview

The group pricing maintenance form allows you to selectively mass update price type, price source, price/percent amount, quantity start, and quantity end to existing group pricings.

Usage

The group pricing maintenance form is divided into three parts:

- Search Fields
- Update Options
- Result Grid View

Search

📑 Close 🥸 Search 🧼 Clear		
Search	Search Item	Search Customer
Price Type: V X	Item:	Customer:
Group Name:	Item Descr:	Customer Class:
Show Inactive		

The form allows you to search by Price Type, Group Name, Item Number, Description, Customer Number, or Customer Class. It also allows you to show or hide inactive group pricings.

The Price Type field features a dropdown that lists all the available price types.

Search			
Price Type:		~	x
Group Name:	FixedAmount PercentAdjustment AmountAdjustment MarkupPercent MarcinPercent		

Note: Switching between price types will automatically trigger a search. This is because the Adjust By, Price Increase, and Percentage of Price update options are available only for selected price types.

Grid View

The grid view shows all the group pricings (for the criteria defined in the search boxes) listed by item number:

Values that are unchanged have gray text; whereas new values are highlighted with red text.

Note: All fields marked as New are editable. In order to save the changes, you must click **Apply** in the top right part of the screen. Values can also be mass updated by using the update options pane.

Update Options

Price Type:		~	×				
Price Source:		~	×				
Adjust By:	Amount	~	×				
Price Increase:	\$0.00 0						
Qty Start:							
Qty End:			0				
Calculat	e	Apply					

Values such as Price Type, Price Source, Adjust By, Qty Start, and Qty End can be applied to the entire table, or to specific items by highlighting them and then checking the box **Selected Items Only**.

To update your current pricing with the new values in update options, hit **Calculate** first (this will update the values in the grid view), then hit **Apply** to save the new values.

Note: In order to modify the Adjust By amount, you need to filter a specific Price Type; this is because the adjustment value would have different meanings for different price types.

Adjust By

The field Adjust By has two options: Amount and Percent.

Update Options									
Price Type:	FixedAr	nount		~	×				
Price Source:	None			~	×				
Adjust By:				~	×				
Price Increase:	Amoun	t							
Qty Start:	Percent	t			_				
Qty End:					0				
Calculate	e		Арр	ly					
Selected Ite	ms Only								

When Adjust By is set to Amount, the value that is put in Price Increase represents the dollar amount change in the price value. For instance, if the group pricing to be updated has a value of \$14.59 and you put \$5.00 in Price Increase, after you hit **Calculate** and **Apply** the new price value will be \$19.59.

Update Options								
Price Type:	FixedAmo	FixedAmount 🗸 🗙						
Price Source:	None		V	х				
Adjust By:	Amount		¥	×				
Price Increase:			\$0	.00				
Qty Start:				0				
Qty End:				0				
Calculate	e	Apply						
Selected Ite	ms Only							

A positive value means an increase in the price adjusted, whereas a negative value will result in a decrease in the price.

When Adjust By is set to Percent, the value that is put in the Percentage of Price field represents the adjustment percent. For instance, if the group pricing to be updated has a value of \$20.00 and you put 95% in Percentage of Price, after you hit **Calculate** and **Apply** the new price value will be \$19.00.

Update Options

Values less than 100% will result in a decrease of the price , whereas values greater than 100% will result in an increase.

- Markup Percent:
 - Standard Cost
 - Current Cost
- Margin Percent:
 - Standard Cost

Quantity Start/End

To adjust quantities simply put values in Qty Start and Qty End, then click **Calculate** to update the table, and click **Apply** to save the new values.

Note: Qty End must be greater than Qty Start; under these circumstances, the values will be adjusted in the grid view.
