Headless Printing

Megan De Freitas - 2024-11-22 - [Miscellaneous](#)

Definition

Headless printing describes printing without a dialog box.

Settings

Automatically Print - Flags whether or not printing requests should show a popup or simply use default printer setting to print documents.

Default Printer - Flags where automatic printing happens.

Print Finished Shipments - Flags whether or not printing requests should happen automatically after "Finish Shipment" is clicked on the Shipment Editor.

| Print Settings | |
|--------------------------|------------------|
| Automatically Print | False |
| Default Printer | Zebra ZP 450 CTP |
| Print Finished Shipments | True |

Printing

The action menu's Print button will respect the aforementioned settings. Likewise, the Finish Shipment button on the Shipment Editor will attempt to print if flagged using the above settings.
