

## Headless Printing

Megan De Freitas - 2024-11-22 - Miscellaneous

### Definition

Headless printing describes printing without a dialog box.

### Settings

*Automatically Print* – Flags whether or not printing requests should show a popup or simply use default printer setting to print documents.

*Default Printer* – Flags where automatic printing happens.

*Print Finished Shipments* – Flags whether or not printing requests should happen automatically after “Finish Shipment” is clicked on the Shipment Editor.

Print Settings	
Automatically Print	False
Default Printer	Zebra ZP 450 CTP
Print Finished Shipments	True

### Printing

The action menu’s Print button will respect the aforementioned settings. Likewise, the Finish Shipment button on the Shipment Editor will attempt to print if flagged using the above settings.
