Hiding an Address on Reports for Blind Ship

Cavallo Support - 2024-11-22 - Reporting

Reports can be modified to hide addresses from printing when the Blind Ship Smart Field box is checked.

Blind Ship Field:

Note: The *Blind Ship Field* setting must first be enabled in Modules > Settings.

In this example, the report shown will be modified with a script to change the highlighted address so that if the order is blind shipped, this address will not appear on the printed report:

Fabrikam, Inc.
4277 West Oak Parkway
Chicago, IL 60601-4277
United States
P:(312) 436-2671
F:(312) 436-2896

Purchase Order #	Customer ID	Shipping Method	Payment Terms	Req'd Ship Date	Master #
	AARONFIT0001	LOCAL DELIVERY	NET 30	04/12/2017	325

Quantity Ordered	Quantity BO	UOM	Item #	Description	Price	Extended Price
2	0	EACH	128 SDRAM	128 meg SDRAM	135.20	266.40
2	0	EACH	333PROC	333 Processor	239.95	239.95
2	0	EACH	4.5HD	4.5 gig Hard Drive	189.95	379.90
2	0	EACH	40X IDE	40x CD-ROM	39.95	39.95

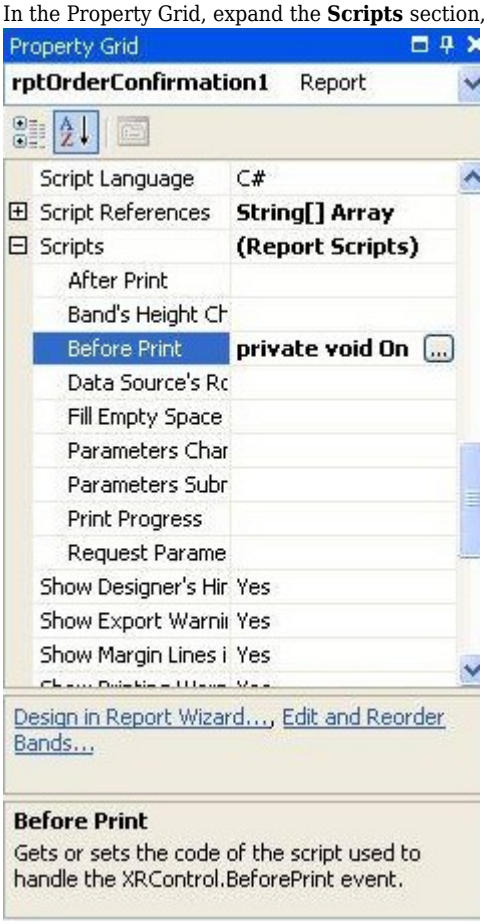

Procedure:

1. Open a document
2. Make sure the **Blind Ship** box is checked
3. Click **Print**
4. Select the report that should be modified and click **Properties**

5. Click **Design** to open the Report Designer
6. On the Report Designer window, highlight the section containing the top address to be hidden

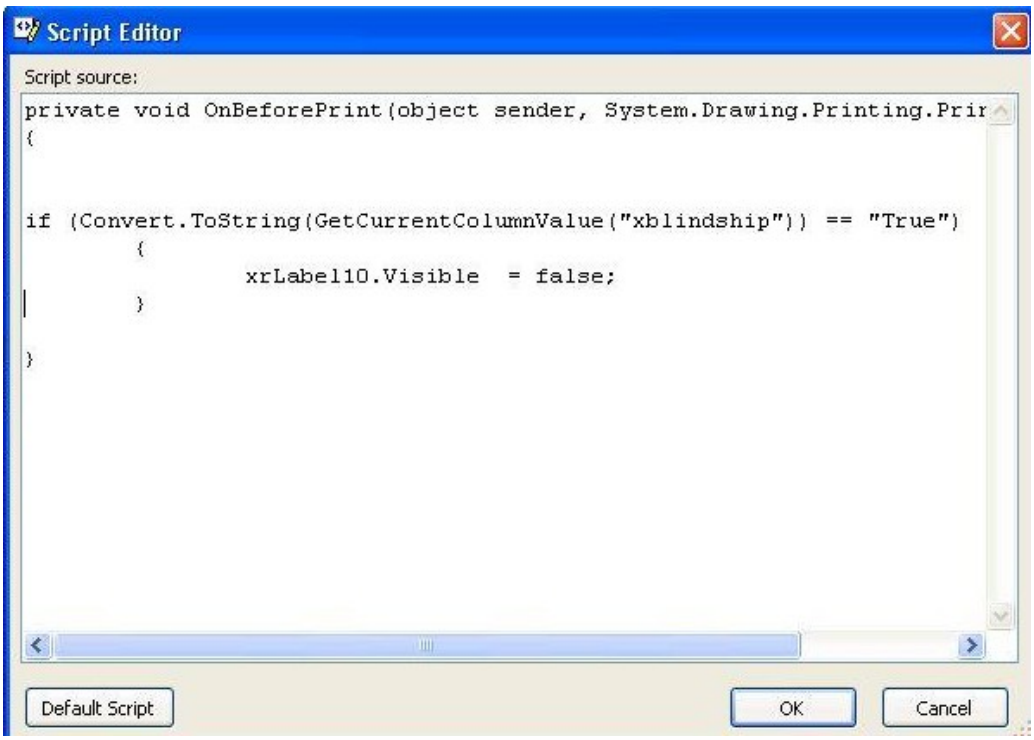

7. In the Property Grid, expand the **Scripts** section, highlight Before Print and click the ellipsis (**...**):

8. The Script Editor will open. Add the following script and click **OK**:

```
if (Convert.ToString(GetCurrentColumnValue("xblindship")) == "True")
{
xrLabel10.Visible = false;
}
}
```

Note: The example script can be modified to reflect your setup. In the example, xblindship is the smart field that was configured in SalesPad and xrLabel10 is the label on the report that will be modified based on whether or not the order needs to be blind shipped.

9. Save your changes and close the Report Designer
10. On the Report Properties screen, click **OK**

Now you can print the report. Since Blind Ship was checked, the address will not print, and will not print on the selected report whenever Blind Ship is checked. You can repeat the process for additional reports.
