How do I add images of my items?

Cavallo Support - 2025-06-11 - FAQ

Product images can be added using user defined fields on the Item Master business object. You can also set up a user defined field as a hyperlink that automatically generates the item's page on your company website, so users can click on it to see product images and other information about the specific item.

To set up item images in SalesPad Desktop, refer to the following SalesPad Desktop articles:

- User Defined Fields
- User Field Hyperlinks: Item Number Generation
