How does SalesPad Cloud handle taxes?

Megan De Freitas - 2024-12-02 - FAQ

SalesPad Cloud uses [Tax Codes](#) set up in the user's QuickBooks Online account. Tax Codes are assigned to [Contacts](#) in SalesPad Cloud. SalesPad Cloud uses the Shipping Contact's Tax Code to determine taxes charged on a sales document. If the item(s) on the sales document is taxable, it will be taxed based on the Tax Code found on the shipping address for the Shipping Contact.
