How is sales tax determined for my SalesPad Cloud subscription?

Megan De Freitas - 2024-12-02 - FAQ

To determine if we need to charge sales tax on your SalesPad Cloud subscription (sales tax laws differ from state to state), SalesPad will pull your company address from QuickBooks Online. If your company is located in a state which requires a sales tax on software, taxes will be added to your monthly subscription rate.

If you do not have a company address listed in QuickBooks Online, SalesPad will use the billing address associated with your credit card to calculate sales tax.
