

Import Option Settings Threshold

Megan De Freitas - 2024-11-22 - Miscellaneous

Overview

In Ship To, the *Threshold for Signature Required* setting in Import Options makes it possible for you to specify the minimum value for which a signature is required on delivery. This allows you to use the signature required delivery confirmation option if the order is over the specified total.

Another setting in Import Options, "Use Delivery Confirmation Options," can be used to specify whether package delivery confirmation options are available through UPS World Ship.

Setup

Security

Go to the Ship To Settings Module and Filter to Import Options.

Import Options	
Already Exported	xSpecial_Order
Bill To Account #	
Bill Transportation To	
COD Amount	
Declared Value	
Email Source	
Required Batch	
Residential	
Sender ID	
Threshold for signature required	200
Tracking Number	
Use delivery confirmation options	True

You will see the *Threshold for signature required* setting, where you can manually enter the number you desire as the minimum value (ex. 200). If left blank, then no signature is required. The setting defaults to ''.

To enable the *Use delivery confirmation options* setting, set it to True.

Usage

Use delivery confirmation options

When enabled, the *Use delivery confirmation options* automatically specifies whether delivery confirmation options (No Signature Required, Signature Required, Adult Signature Required) are available in UPS World Ship.

Threshold for signature required

If the minimum value is set at \$ 200 and you open a document with a total greater than \$ 200, Signature Required is automatically set in the Package Delivery Confirmation window in UPS World Ship. Otherwise, it defaults to No Signature Required.

The screenshot displays the UPS WorldShip software interface. At the top, a window titled "ShipTo Import - All Batches" contains a search bar and a table of shipping documents. Below this, a "Shipping Monitor" window shows a table with columns for Sales Doc Num, Customer Name, Total, Shipping Method, and Req Ship Date. The table lists two documents: ORDST2790 and ORDST2791, both for Aaron Fitz Electrical/AARONFIT0001, with shipping methods of LOCAL DELIVERY and a required ship date of 7/23/2013.

An "Enter import key:" dialog box is overlaid on the interface, with the document number "ORDST2791" entered in the text field and a "Close" button.

The main window shows the "Detail" tab for the selected document. It features several sections of options:

- Shipment Options:** Handling Charge, Import Control, Quantum View Notify, Return Services, Saturday Delivery, Saturday Pickup, UPS carbon neutral.
- Package Options:** Additional Handling, COD, Dangerous Goods, Declared Value, **Delivery Confirmation** (checked), Dry Ice, Quantum View Notify, Shipper Release.
- Package Delivery Confirmation:** No Signature Required, **Signature Required** (selected), Adult Signature Required.

Below the options, the cost summary shows:

- Option Cost: 0.00 USD
- Total Cost: 0.00 USD

A "Detail Cost" button is located at the bottom right of the options panel. The UPS logo and "WorldShip 2013" branding are visible on the right side of the window.
