

## Import Option Settings Threshold

Megan De Freitas - 2024-11-22 - Miscellaneous

### Overview

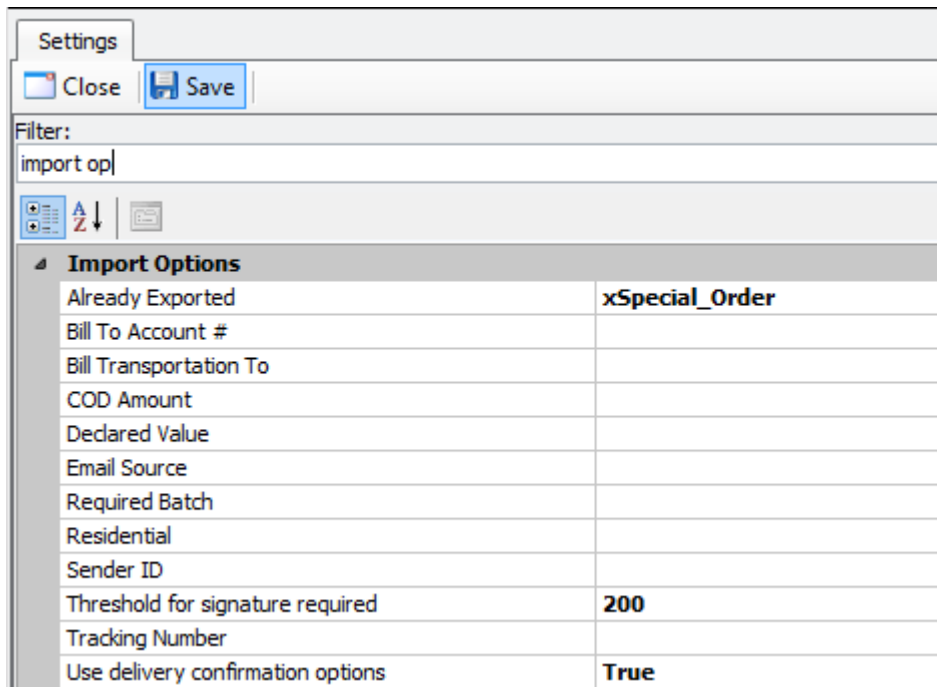

In Ship To, the *Threshold for Signature Required* setting in Import Options makes it possible for you to specify the minimum value for which a signature is required on delivery. This allows you to use the signature required delivery confirmation option if the order is over the specified total.

Another setting in Import Options, "Use Delivery Confirmation Options," can be used to specify whether package delivery confirmation options are available through UPS World Ship.

### Setup

#### Security

Go to the Ship To Settings Module and Filter to Import Options.

Import Options	
Already Exported	xSpecial_Order
Bill To Account #	
Bill Transportation To	
COD Amount	
Declared Value	
Email Source	
Required Batch	
Residential	
Sender ID	
Threshold for signature required	200
Tracking Number	
Use delivery confirmation options	True

You will see the *Threshold for signature required* setting, where you can manually enter the number you desire as the minimum value (ex. 200 ). If left blank, then no signature is required. The setting defaults to ''.

To enable the *Use delivery confirmation options* setting, set it to True.

## Usage

### Use delivery confirmation options

When enabled, the *Use delivery confirmation options* automatically specifies whether delivery confirmation options (No Signature Required, Signature Required, Adult Signature Required) are available in UPS World Ship.

### Threshold for signature required

If the minimum value is set at \$ 200 and you open a document with a total greater than \$ 200, Signature Required is automatically set in the Package Delivery Confirmation window in UPS World Ship. Otherwise, it defaults to No Signature Required.

The screenshot displays the 'ShipTo Import - All Batches' window. At the top, there is a search bar and a table of documents. The table has columns for Sales Doc Num, Customer Name, Total, Shipping Method, and Req Ship Date. Two documents are listed: ORDST2790 and ORDST2791, both for Aaron Fitz Electrical/AARONFIT0001, with shipping methods of LOCAL DELIVERY and a required ship date of 7/23/2013.

Below the table, the 'UPS WorldShip' window is open, showing a configuration window for document 'ORDST2791'. The window title is 'Enter import key:'. The document ID 'ORDST2791' is entered in a text field, and a 'Close' button is visible.

The configuration window has tabs for 'Service', 'Options', 'Detail', and 'Reference'. The 'Options' tab is active, showing 'Shipment Options' and 'Package Options'. Under 'Shipment Options', several checkboxes are listed, including 'Handling Charge', 'Import Control', 'Quantum View Notify', 'Return Services', 'Saturday Delivery', 'Saturday Pickup', and 'UPS carbon neutral'. Under 'Package Options', 'Delivery Confirmation' is checked, while others like 'Additional Handling', 'COD', 'Dangerous Goods', 'Declared Value', 'Dry Ice', 'Quantum View Notify', and 'Shipper Release' are unchecked.

The 'Package Delivery Confirmation' section has three radio buttons: 'No Signature Required', 'Signature Required' (which is selected), and 'Adult Signature Required'. Below this, a note states: 'UPS may obtain, at its discretion, a signature or other electronic acknowledgment of receipt from the recipient when this option is selected.'

At the bottom of the configuration window, the 'Option Cost' is 0.00 USD and the 'Total Cost' is 0.00 USD. A 'Detail Cost' button is located at the bottom right.

The UPS logo and 'WorldShip 2013' branding are visible on the right side of the configuration window.
