Interactions

Megan De Freitas - 2024-11-22 - [CRM](#)

Overview

Many SalesPad business objects support the creation of Interactions. Interactions are CRM events that show the relationship between different facets of the business.

Interaction Grid

Action Toolbar

Add will add a new interaction to this screen.

Delete will delete an interaction from this screen.

Edit will enable you to edit an existing interaction from this screen.

New Interaction Entry

Subject: title of the interaction.

Notes: body of the interaction

Interaction Type: dropdown menu of pre-defined types, such as incoming phone call, office visit, etc.

Start/Ends On: date and time ranges for the interaction.

All Day Event: checkbox that will flag the interaction as such, or if unchecked, allows the user to define the time of the interaction.

Remind: the level of follow-up for this particular interaction.

Assigned To: set the interaction to a specified user of GP.

Is Complete: flag the interaction as complete and will remove it from SalesPad today.

Contact Person: person with whom the interaction took place.

Location: where the interaction took place, if applicable.

Status: the current status of the interaction.

Created On: date the interaction was entered into GP.

Prospect Interactions
