Inventory Transaction Search

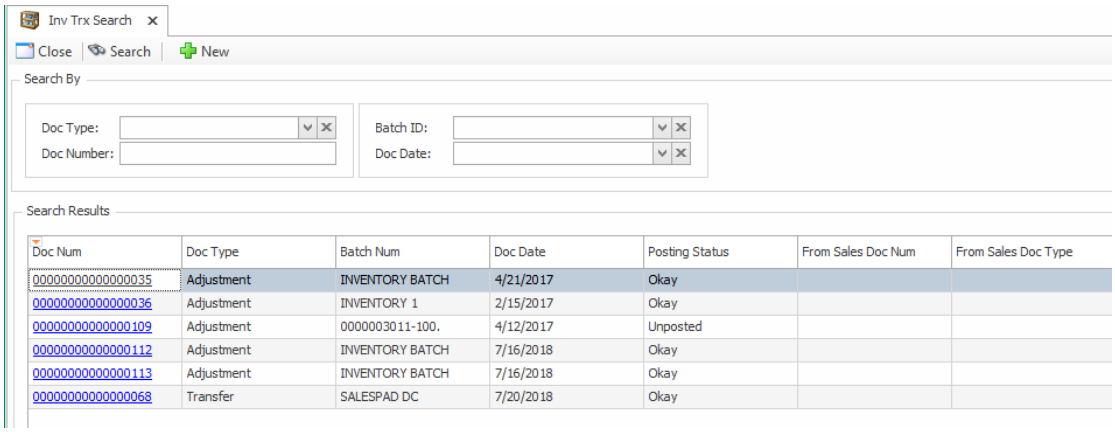

Cavallo Support - 2024-12-03 - Inventory

Overview

The Inventory Transaction Search module allows for the lookup of existing inventory transactions. Transaction types that appear in these results include Inventory Adjustments, Inventory Transfers, and Variances.

Usage

To use this module, fill out the Search By fields as desired, then click on the **Search** button. Leaving all Search By fields blank when clicking the Search button will return a list of all inventory transactions.

Security

Inventory Adjustment Search - Grants users access to the module to perform searches.
