Is CardControl PCI Compliant?

Cavallo Support - 2024-12-02 - FAQ

After October 29, 2019, SalesPad will no longer be supporting CardControl. Additionally, the application will cease to be a PA-DSS validated solution as of this date, and therefore CardControl customers would no longer be PCI compliant.

CardControl is PA-DSS certified, which means it follows the requirements and supports the user's goal to become PCI Compliant. It is the responsibility of the user/business to achieve PCI Compliance within their company.

Note: As of version 3.0.12.0, the 'Disable TLS 1.0' setting must be set to True in order to fulfill PCI requirements. Earlier versions will need to upgrade in order to remain compliant.
