

Item Maintenance

Megan De Freitas - 2024-11-22 - Inventory

Overview

The Item Maintenance screen, which can be accessed from a sales document or from Inventory Lookup, allows users to create new items and modify the information for existing items.

Creating a New Item

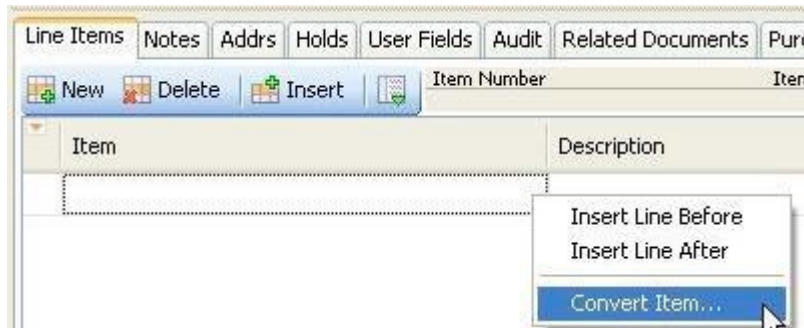

FROM INVENTORY LOOKUP

Open Inventory Lookup and click **New Item**. The Item Maintenance screen appears. Skip to the Item Maintenance section of this document to continue.

FROM A SALES DOCUMENT

Open a sales document and click **New** on the Line Items tab. Right-click on the new line and select **Convert Item**.

Note: You can also right-click on an existing item in the document and click **Convert Item** to edit its information.

The Item Maintenance screen appears. Continue to the Item Maintenance Section below.

Item Maintenance

Enter the new item information on the Item Information tab (see the SalesPad [User Defined Fields](#) document for information on adding Item User Fields).

The screenshot shows the 'Item Maintenance' window with the 'Properties' and 'Item User Fields' tabs selected. The 'Properties' tab contains the following fields:

- Item Number: HD-20
- Copy From Item: (empty field with ellipsis)
- Copy Item Standard Pricing
- Item Description: 20 Gig Hard Drive
- Short Description: HD20
- Generic Description: HD
- Replaced By: (empty field)
- Class ID: RETAIL
- Track: None
- Item Type: Sales Inventory
- Valuation Method: FIFO Perpetual
- Quantity Decimals: 0
- Currency Decimals: 2
- Shipping Weight: 0.75000
- U Of M Schedule: EACH
- Selling UoM: EACH
- Price Level: EXTPRCLVL
- Sales Tax Option: Based On Cu...
- Purchase Tax Option: Based On Ve...
- Sales Tax Schedule: (empty field)
- Purchase Tax Schedule: (empty field)
- Standard Cost: 10.00
- Current Cost: 12.25
- List Price: 33.00
- Allow Backorders
- Item Blocked
- Inactive

The 'Item User Fields' tab contains the following fields:

- LPC: jdher.123579sre
- Item Category 2: Contempo
- Separate Delivery Required?:
- Extended Description: (empty field)
- Feature: Medium
- Item category: (empty field)
- Lead Time: 6
- Data Sheet: C:\Documents and Settings\timh.SP... (with ellipsis)
- Customer Item Number: JACOB

Buttons for 'Save' and 'Cancel' are visible at the bottom right.

Note: Use the Copy From Item field to enter an existing item number from which to copy item information. You can also use the ellipsis (...) to open a new Inventory Lookup to find an item for copying. This field will be accessible for new items only.

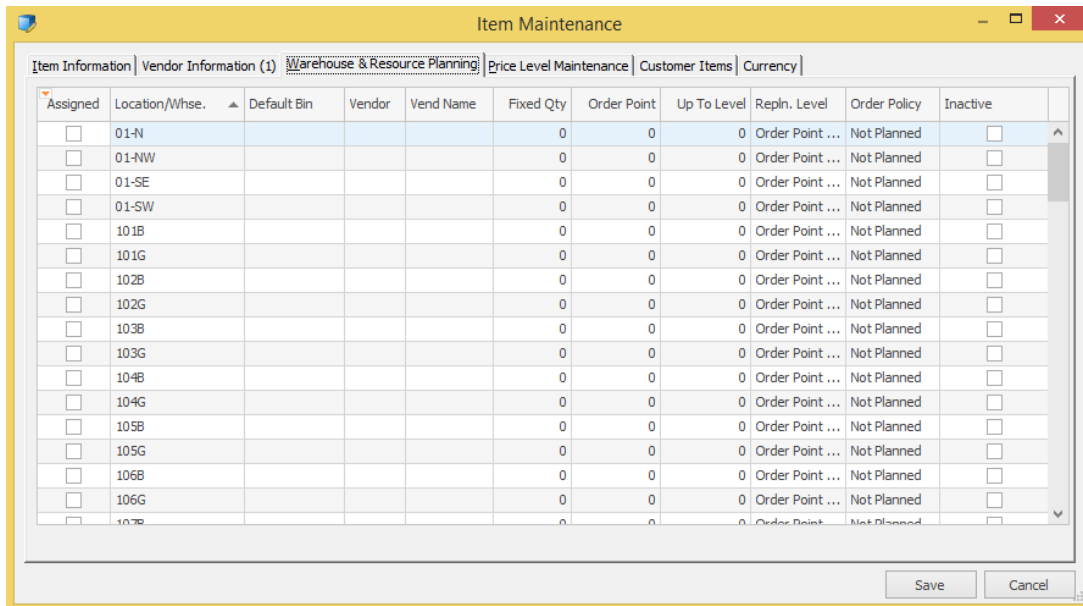

If the item is a vendor item, select the Vendor Information tab and click **New**. Select the Vendor ID for the item vendor and specify Vendor Item Number.

The screenshot shows the 'Item Maintenance' window with the 'Vendor Information' tab selected. A 'New' button is visible above a table with the following data:

Vendor ID	Vendor Name	Vend Item Number	Vend Item Descr	Min Order Qty	Max Order Qty	Economic Order Qty	Requisitions
(dropdown)		000626*****	BRS Bio Pellets 500ml	0	0	0	0

To assign custom item numbers to each customer for this item, select the Customer Items tab and click **New**. Select the Item Number and Customer Number, then assign a Customer Item Number.

Enter the applicable order quantities and select the Warehouse & Resource Planning tab. Assign the item to a warehouse or warehouses by clicking the check boxes.

Click the appropriate fields to select a vendor, enter quantity and order point, and select ordering rules. When finished, click **OK**.

You will be prompted to update the unit price with the list price defined for that item. Select **Yes** or **No**. You will then return to the sales document. The new item will now be in the SalesPad Item database.

EDITING AN EXISTING ITEM

To edit an existing item in SalesPad, access the Item Maintenance screen from a sales document or from Inventory Lookup.

From a sales document

Open a sales document and click **New** on the Line Items tab. Enter the item number of the item you wish to edit, then right-click on the line item and click **Convert Item**.

From Inventory Lookup

You can either use the **New Item** button and enter the item number to make changes to existing item information, or, in older versions, navigate to **Modules > Inventory Lookup**, perform an inventory search, and select the item you wish to work with. In the bottom portion of the SalesPad window, select the Item Properties tab. Click the ellipsis (...) button to the right of the Item Number field. The Item Maintenance screen appears.

Make any needed changes on the Item Maintenance screen and click **OK** to update.

Note: In versions 4.1 and later, users can also edit the vendor number for a vendor item on the Vendor Information screen.

Note: In version 4.0 and later, all vendor information is editable from the Item Maintenance screen.

Security

Item Maintenance must be enabled in the Security Editor to enable the Item Maintenance screen. To edit items, *Item Properties* must be enabled, and *Can Edit* must be set to True.

To add items from Inventory Lookup, Inventory Lookup must be enabled and *Can Create Items* must be set to True (versions 4.0.987 and higher only).

Settings

Allow UOM Changes must be set to True to allow unit of measure changes in Item Maintenance (required for adding new items).
