Purchase Order User Fields Security Allow Historical Edit

Megan De Freitas - 2024-11-22 - [Purchasing](#)

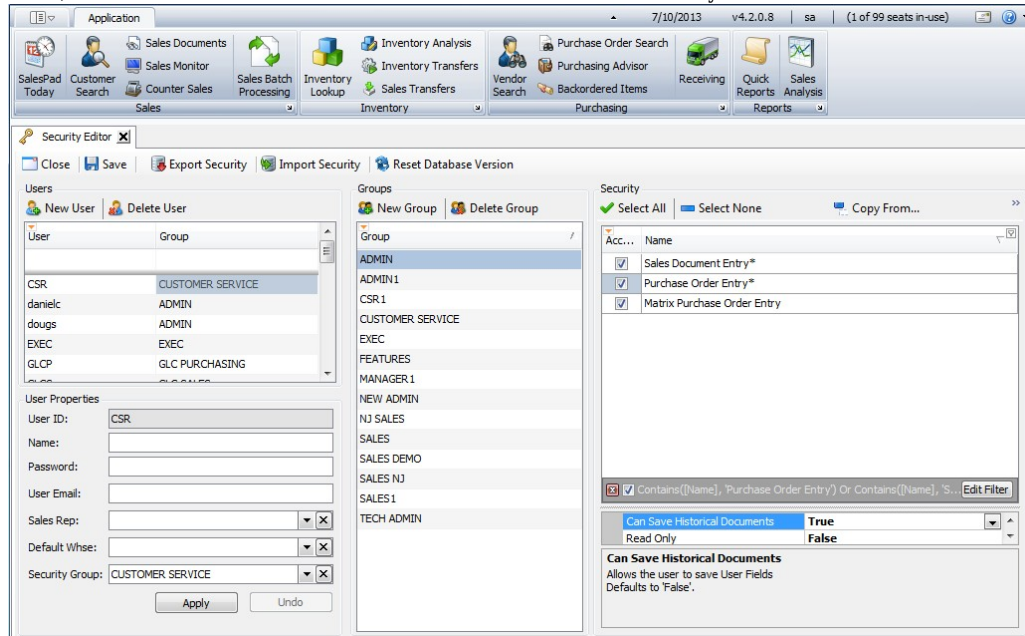

Overview

A new security setting in Sales Pad allows you to edit User Fields on historical purchase orders.

Setup

Security

1. In the Security Editor, search for purchase order and select the *Purchase Order Entry* setting. Under Misc., set the item *Can Save Historical Documents* to True. This allows you to save user fields.

2. Next, also in the Security Editor, search for purchase order and select the *Purchase Order User Fields* setting. Under Misc., set the item *Allow Historical Edit* to True. With this setting enabled, you are now able to edit the information in the user defined fields on historical documents.

Application 7/10/2013 v4.2.0.8 sa (1 of 99 seats in-use)
