## Purchased Line Editor

Megan De Freitas - 2024-11-24 - [Purchasing](#)

### Overview

The Purchased Line Editor allows users to look at any sales document with an attached PO and edit quantity ordered, unit price, requested ship date, and ship to address on both the sales order and the purchase order without breaking the link.

### Security

Purchased Line Editor must be enabled in Modules > Security.

**Note:** You must log out and back in for security changes to take effect.

### Usage

To adjust quantities,

1. Go to Modules > Purchased Line Editor
2. Key in any search criteria (or leave blank to return all sales orders with an attached PO) and click **Search**. Results appearing in the grid include both Standard and Drop Ship POs:

**Note:** A green check:  next to the quantity indicates the quantity ordered and quantity received are the same.

A yellow triangle:  means quantity received was more than quantity ordered.

**Note:** If you click the document number, the sales document opens. You can see quantity changes on the sales line, and on the PO accessible from the purchases tab. You can then resubmit the PO to the vendor, indicating that the quantity needed has changed.
