Quick Load Grids

Megan De Freitas - 2024-11-22 - [Setup](#)

Note: This functionality has been removed and been replaced by the Load Visible Columns Security as of version 4.6.2.0 of SalesPad Desktop.

Overview

Quick Load Grids have been placed on key screens where loading large amounts of data may be slow: Customer Overview - Open Sales Document, Customer Contact Addresses, and Sales Fulfillment Plugin - Serial Tracked Items. Instead of loading all the data, these grids will load the top 201 records, then load more records as the user scrolls through the grid.

Note: User Defined Fields are not currently supported on these grids.

Usage

To access additional functionalities besides that found in the orange triangle dropdown in the upper left-hand corner, simply right-click on the columns.
