

Quick Report Finding Syntax Errors in Document Notes

Megan De Freitas - 2024-11-22 - Reporting

Overview

An error will be encountered when a sales document containing improper syntax is opened. Use the Quick Report on the following page to pull all document notes in order to find syntax errors.

Error:

Quick Report:

```
select Notes, * from spv3SalesDocument where CHARINDEX('SalesPad_Notes', cast(notes as varchar(max)))>0
```

```
<br /> foreach (System.Data.DataRow dr in dataRow.Table.Rows) { string allNotes =  
dr["Notes"].ToString();<br /> string preXml =<br />  
(allNotes.IndexOf("<SalesPad_Notes>") == -1 ? allNotes :<br /> allNotes.Substring(0,  
allNotes.IndexOf("<SalesPad_Notes>"))).TrimEnd('\r','\n',' ');<br /> string postXml =  
(allNotes.IndexOf("</SalesPad_Notes>")<br /> == -1 ? "" :<br />  
allNotes.Substring(allNotes.IndexOf("</SalesPad_Notes>")<br />  
+("</SalesPad_Notes>").Length)).TrimEnd('\r','\n',' ');<br /> string xml =  
allNotes.Substring(allNotes.IndexOf("<SalesPad_Notes>")); xml =  
xml.Substring(0,xml.IndexOf("</SalesPad_Notes>") + ("</SalesPad_Notes>").Length);<br  
xd.LoadXml(xml);<br />  
//System.Windows.Forms.MessageBox.Show(dr["Sales_Doc_Num"].ToString()<br />  
+"\r\n\r\n" + xml);<br /> }<br /> catch (System.Exception ex)<br /> {<br />  
System.Windows.Forms.MessageBox.Show(dr["Sales_Doc_Num"].ToString() + "\r\n\r\n"<br  

```
