

Returns Tracker (fka Case Tracker)

Megan De Freitas - 2024-12-03 - Returns Tracker (fka Case Tracker)

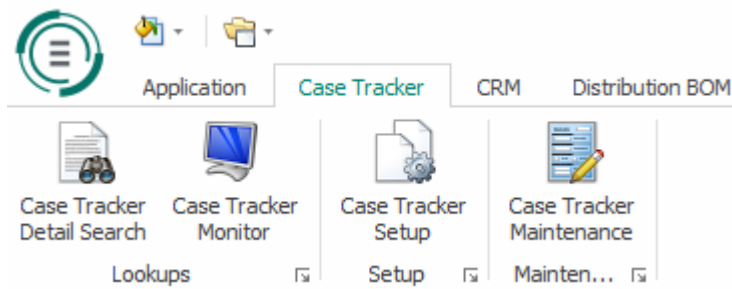

Overview

The Returns Tracker (fka Case Tracker) module offers a solution for monitoring different customer-related issues in order to verify that each issue is resolved in a timely, appropriate fashion. Cases can be linked to customers and specific sales documents, and they can be managed from one central location.

Data entered in the Case Tracker module is only stored in SalesPad's SQL tables; it does not affect Microsoft Dynamics GP SQL tables. Case Tracker is available via a separate dll. For information on acquiring the Case Tracker dll, please contact your territory manager.

Usage

After installing the dll, the Case Tracker tab is available along the top of the screen. From this tab, you can access the Case Tracker modules.

New cases can be created on the Case Tracker Entries tabs on either the Customer card or sales document. From either location, click the **New Case** button in the upper left-hand corner of the tab to create the new case. If a new case is created from the Customer card, it can be assigned to a sales document at any time.

The tabs on the lower section of the Case Tracker Entry screen allow further definition of the case. Edit the details of the case (including the issue, cause, and resolution, which are defined in the Case Tracker Maintenance module) in the Details tab. Click **Add Detail** to start.

Details User Fields Resources Interactions Audit AR Transactions Reorders>Returns

+ Add Detail Delete Detail

Case Details

Item Number	Qty	Issue	Cause	Resolution	Comment	Sales Doc Num	Sales Doc Type
-------------	-----	-------	-------	------------	---------	---------------	----------------

Select the item associated with the case by clicking the **ellipses** in the Item Number column. The Sales Line Selector will appear with a list of items on the sales document. Select the desired item(s), then click **OK**.

The Detail Properties section of the Details tab is used to define the Issue, Cause, and Resolution of lines added to the Case Details tab. Issues, Causes, and Resolutions are created in the Case Tracker Maintenance module.

Detail Properties

Detail ID: 3

Issue

Issue: Broken merchandise Issue ID: 1

Description: Customer unsatisfied with quality of merchandise

Cause

Cause: Bad packaging Cause ID: 2

Description: Insufficient or damaged packaging

Resolution

Resolution: Reorder generated Resolution ID: 1

Description: Items replaced

User fields created on the Case Tracker Case business object appear in the User Fields tab.

Documents and other files can be added to cases from the Resources tab. For more information on resources, see the documentation [here](#).

SalesPad Interactions can be added to cases from the Interactions tab. For more information on Interactions, see the documentation [here](#).

The Audit tab tracks changes made to the Customer Information and Case Details windows over the life cycle of a case.

AR Transactions can be added and linked to a Case Tracker case from the AR Transaction tab. For more information on AR transactions, see the documentation found [here](#).

The Reorders/Returns tab allows addition and linking of multiple reorders and returns to a case .

Case Tracker Detail Search

The Case Tracker Detail Search screen allows you to sort through existing cases and quickly access any of these cases.

Case Track ID	Customer Num	Customer Name	Cause	Issue	Resolution	Status	Contact
1	AARONFIT0001	Aaron Fitz Electrical				Open	Mark

Case Tracker Setup

Case statuses are created in the Case Tracker Setup module. Statuses are created with the **Add** button and removed with the **Delete** button. Each status will have its own entry in the Case Tracker Monitor tree layout.

Status	Description	Set Historical	Created By	Created On	Updated By	Updated On
New Case	Newly Entered	<input type="checkbox"/>	sa	5/17/2018	sa	5/17/2018
In Progress	Case undergoing evaluation	<input type="checkbox"/>	sa	10/9/2018	sa	10/9/2018
Resolved	Case has been completed. No further action needed.	<input type="checkbox"/>	sa	10/9/2018	sa	10/9/2018

Case Tracker Monitor

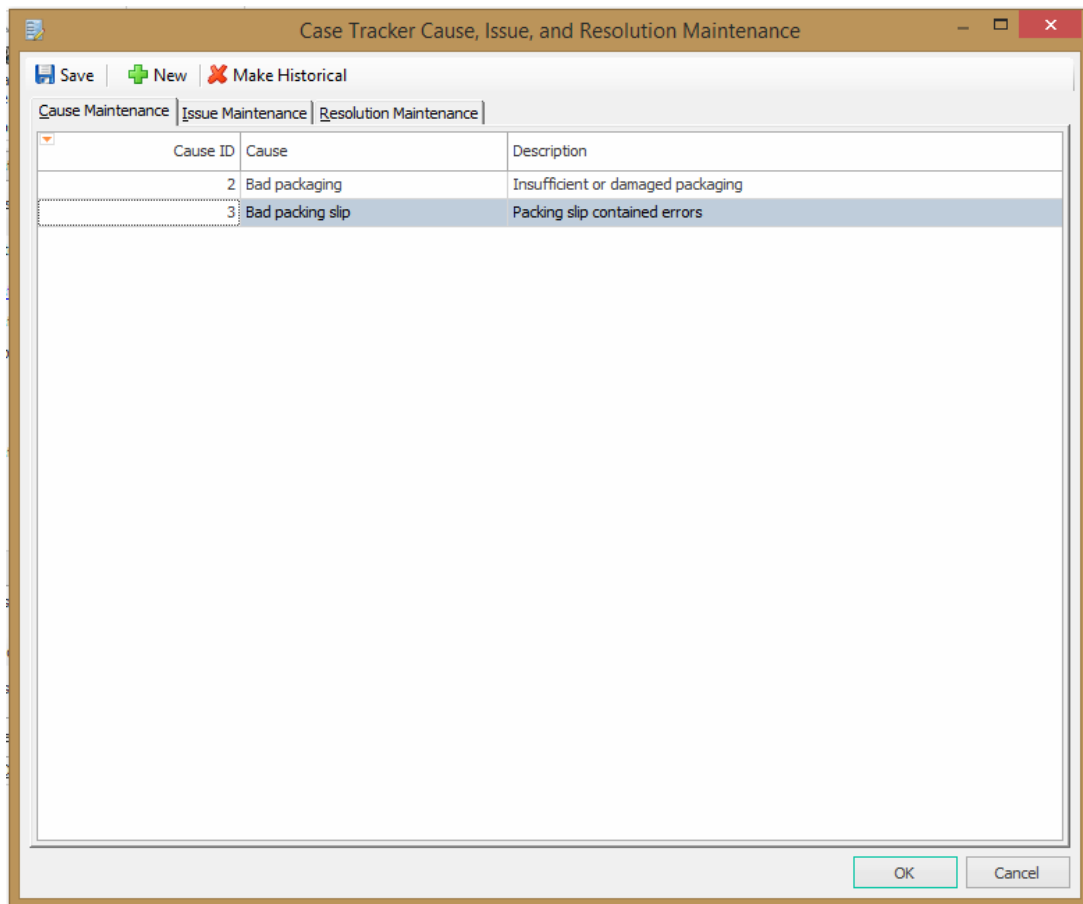

Case statuses can be quickly reviewed in the Case Tracker Monitor module. Each status entered in Case Tracker Setup will appear in Case Tracker Monitor, displaying the number of current cases assigned to the status.

Select	Status	Count
<input checked="" type="checkbox"/>	In Progress	0
<input checked="" type="checkbox"/>	New Case	1
<input checked="" type="checkbox"/>	Resolved	0

Case ID	Customer Num	Contact	Assigned To	Case Tracker Status
4	AARONFIT0001		sa	Newly Entered

Case Tracker Maintenance

Issues, Causes, and Resolutions entered in new cases are created in the Case Tracker Maintenance module. To create a new Cause, Issue, or Resolution, click on the relevant tab, then click the **New** button and enter an ID, name, and description. To make a selected line historical, and thereby remove it from the list, simply click the **Make Historical** button.

Security

Case Tracker AR Transaction Entry - No description available.

Case Tracker AR Transactions - Grants access to the Case Tracker AR Transactions tab on the Case Tracker Entry screen.

Case Tracker Audit - Grants access to the audit tab on the Case Tracker Entry screen.

Case Tracker Detail Search - Find Case Tracker details based on various search parameters.
