## SalesPad Cloud Open API

Megan De Freitas - 2024-12-02 - Miscellaneous

### Overview

An Open API is our way of inviting you to collaborate with us in order to build a bigger, better product that suits a wide variety of needs. We're excited to see what our customers come up with, and we're eager to [field any additional questions](#) you may have as you tinker around in our workshop.

Our Open API is powered by Swagger, which we chose because of its strength as a platform and its familiarity to developers.

Click [here](#) to access the SalesPad Cloud Open API.
