Activity Locks | SalesPad Desktop

Cavallo Support - 2025-06-05 - Video

This video discusses how to use the "Active Locks" module in SalesPad GP for Microsoft Dynamics GP. This feature allows the user to view any active documents currently open and which user has them open. While a document is open, it is locked for editing; however, a read-only copy can be viewed. The ability to unlock a document another user has open is controlled in Security.
