Customer Search | SalesPad Desktop

Cavallo Support - 2025-06-05 - Video

This video discusses how to use the Customer Search feature in SalesPad GP for Microsoft Dynamics GP. Customer Search is the first tab that opens when the user launches SalesPad GP, and it allows users to quickly find customers and access the information on their Customer Card. Through the Customer Search feature, a user can search based on name, address, email, and more. If the user has a grid selected, they can also search for words or part of a word by using Control + F, similarly to the search function in Microsoft Word.
