Inventory Lookup | SalesPad Desktop

Cavallo Support - 2025-06-05 - Video

This video is a tutorial on how to use the Inventory Lookup module in SalesPad GP for Microsoft Dynamics GP. This module allows users to search for items with any part of the part number or description, add new items, and view details regarding a specific item. Information can include, but is not limited to: which customers have bought the item, the various prices the item has been set to, serial or lot numbers, the quantity, and a graph showing the sales of a specific item over time.
