Purchasing Advisor | SalesPad Desktop

Cavallo Support - 2025-06-05 - Video

This video discusses how to use the Purchasing Advisor feature in SalesPad GP for Microsoft Dynamics GP. The Purchasing Advisor allows you to view demand throughout the system, create purchase plans, and generate purchase orders for a variety of items based on their sales demand and rear order point demand. Like many other features in SalesPad, the Purchasing Advisor can be controlled with Security and with sub-settings. The grid that is used in the Purchasing Advisor can also be customized as each user desires, just like any other grid in SalesPad GP.
