Settings | SalesPad Desktop

Cavallo Support - 2025-06-05 - Video

This video discusses how to use the various settings available to the user in SalesPad GP for Microsoft Dynamics GP. The settings menu can only be accessed to those users who have security. The settings also have a filter bar, so users can more easily find the setting they are looking for (both by name and group name). Settings can be exported or imported, which is useful for multiple companies using SalesPad GP for Microsoft Dynamics GP.
