Vendor Search | SalesPad Desktop

Megan De Freitas - 2025-06-05 - Video

This video discusses how to use the Vendor Search module in SalesPad GP for Microsoft Dynamics GP. Like many other features in SalesPad GP, Vendor Search can be modified with sub-settings and security settings. Additionally, the grid that makes up the Vendor Search can be customized by each user so they can see the fields they use the most. Any of these columns are able to be filtered to find vendors (i.e. based on address, name, state).
